

Gravis Finance

We gamify blockchain

Powered by

The play-to-earn model popularized by Axie Infinity gave an opportunity to make money to a vast number of people.

The next generation of blockchain games should have more advanced graphics and storyline but still be profitable to gamers.

We created an (A)steroid Mining game based on the principles above.

The material in this presentation has been prepared by Gravis Finance (Gravis) and is general background information about Gravis' activities current as at the date of this presentation. This information is given in summary form and does not purport to be complete. Information in this presentation, including forecast financial information, should not be considered as advice or a recommendation to investors or potential investors in relation to holding, purchasing or selling securities or other financial products or instruments and does not take into account your particular investment objectives, financial situation or needs. Before acting on any information you should consider the appropriateness of the information having regard to these matters, any relevant offer document and in particular, you should seek independent financial advice. All securities and financial product or instrument transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk.

Traditional gaming problems

1. Gamers make donations but don't get any money out of it.
2. Fiat marketplaces artificially restrict secondary sales geography.

Blockchain gaming problems

1. Games on blockchain have pretty poor gameplay and graphics.
2. Bad tokenomics models.

Play-to-Earn model

Multi-chain marketplace

Multi-chain marketplace

Higher-than-average yields are ensured by the market analysis and smart contract administration.

Well-defined tokenomics

Higher-than-average yields are ensured by the market analysis and smart contract administration.

Beautiful graphics and captivating gameplay

Our NFTs are compatible with OpenSea and our own GMart NFT Marketplace, and can be traded on Ethereum, Polygon, and BSC networks. Since some NFTs are much rarer than the others their price can skyrocket on the secondary market.

Choose your Captain

Get glorious Captains for your ships from the limited collection. The Captain will give you access to GRVS + GRVX farming pools.

Build your ship

Open lootboxes to find a ship or a building parts container. You can combine building parts to create a ship. Also, you can combine ships into more powerful ones.

Upgrade your gear

You can enhance ship's mining abilities by adding custom parts like Titanium Drill or Dark Matter Engine. These parts can be crafted from collected metal.

Launch!

Once everything is settled, stake your chosen NFT cards to the Mining contract to start your expedition. You can send as many ships as you want.

Trade

Buy or sell any parts, ships, skins or even Captains. Some ships and skins are very rare, and the Captains are released only once.

Choose your Clan

Obtain clan mark to join a Clan. Earn great rewards together with your clanmates against formidable bosses or in Clan Wars.

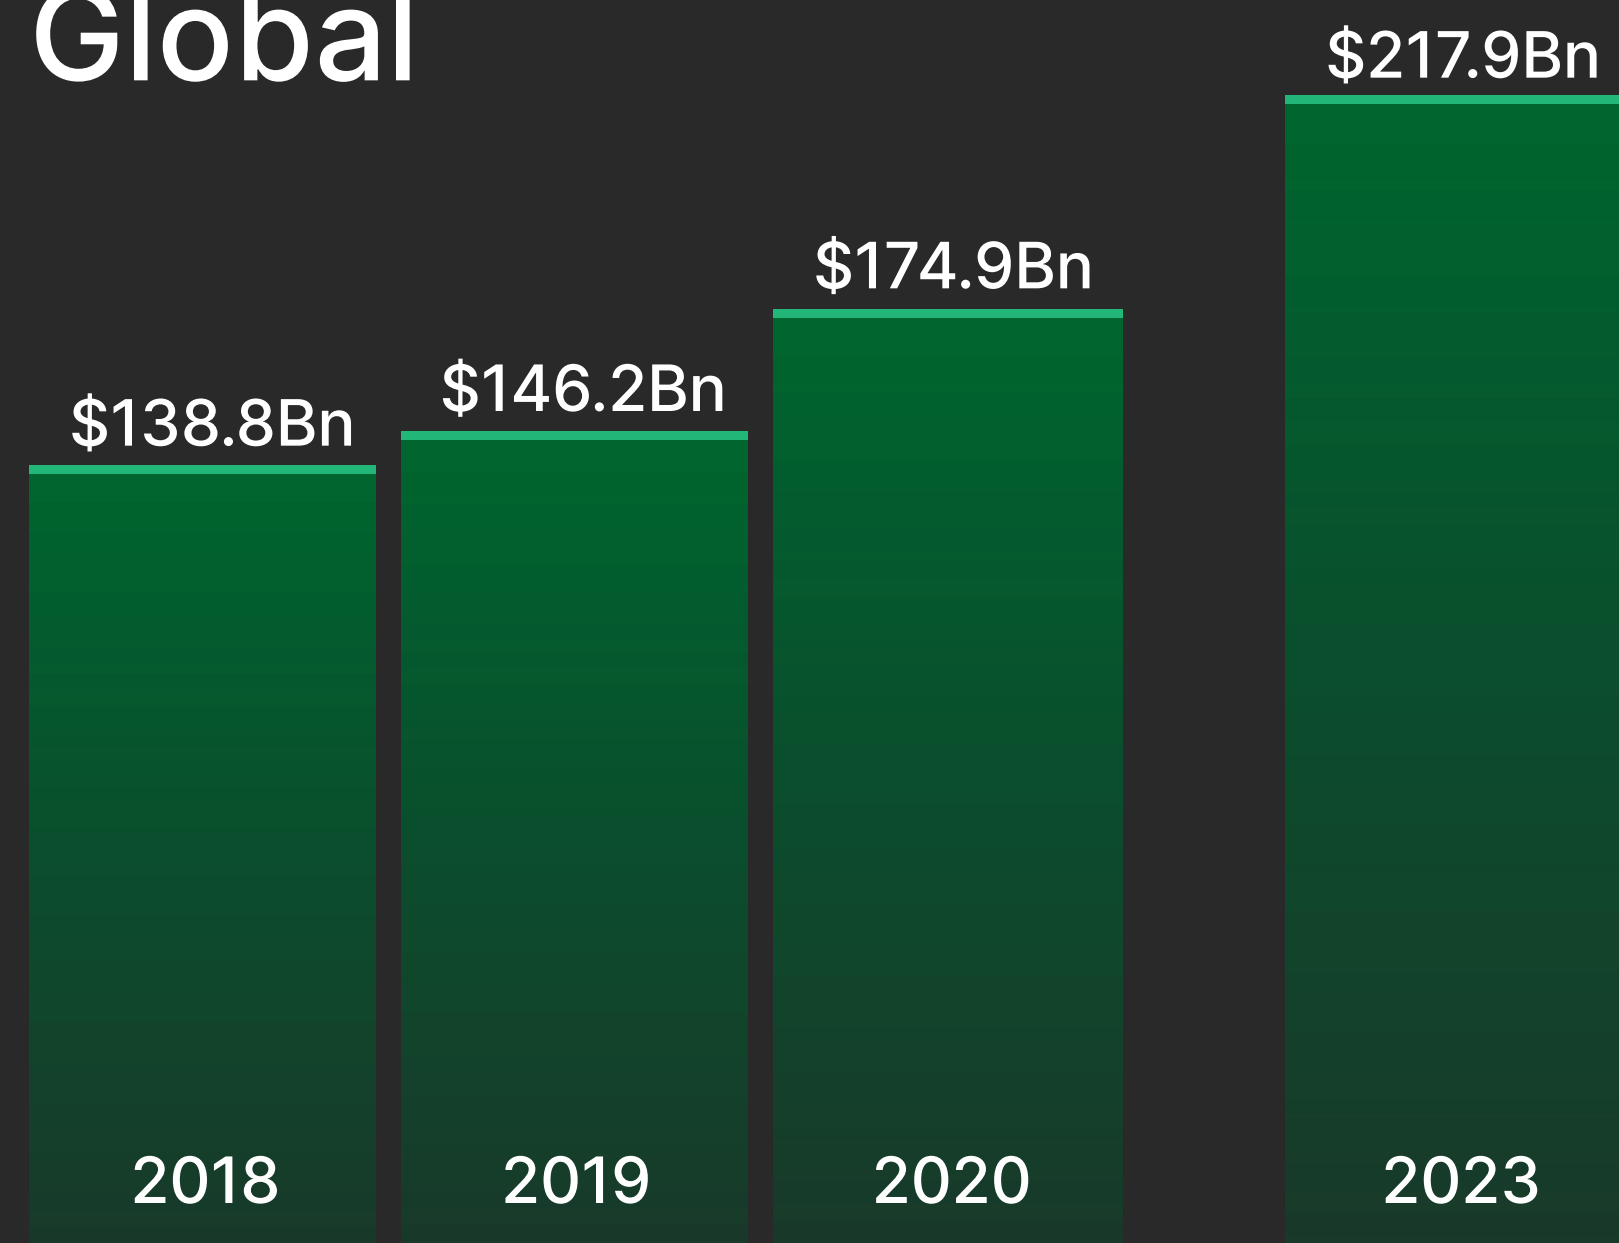

Progress through missions and earn ranks

Missions with different mechanics - exploration, battles, trading. Special missions for Captains and other characters.

Become a space mogul

Rent asteroids for profit yield, craft your own loot boxes for sell, build space stations to harbor other players and more.

Global

 3.1 billion players in 2023

 \$168B in game items

 ARPU \$62

Project capitalization growth for Axie Infinity in 2021

Two tokens: GRVS for governance and GRVX for utility

GRVS

Premium in-game assets can be bought only for GRVS

Metaverse land sale for GRVS

Lower commissions on internal NFT marketplace for GRVS holders

GRVX

(A)steroid Mining players are able to use GRVX to purchase in-game assets

Up to 75% of total supply is collateralized by stablecoins

Buyback and GRVX-stablecoin pairs rebalancing

June

First NFT collection sold for \$150K through our own site

Multi-chain DEX release

(A)steroid Mining design and principles

Partnership with Polygon

July

Captains characters NFT design and art

(A)steroid Mining whitepaper

(A)steroid Mining smart contracts design

Loot boxes logic and randomizer design

August

Captains NFT collection sold out for \$200K

Ships NFT collection sold out for \$120K in 30 minutes

First Mate NFT collection design and art

Partnership with Chainlink

September

Special NFT sale for Captains holders for \$150K

3 smart-contract audits passed with Chainsulting

NFT farming ready to launch

Our own NFT marketplace v2

In-game assets 3D-modeling
