Andy Fastow and Jeffrey Skelling are the infamous duo behind the Enron scandal. How Enron, originally a gas company, turned into a financial powerhouse within 9 years is a lesson in how our markets reached this point. The current market, and all its machinations, are Enron 2.0; this time the regulators are in on revenue stream and have become part of the con. That was Enron's fatal mistake, not paying Uncle Sam.

"it provides an obvious advantage for the bank."
