The letters MMR are significant to this author. He took the government-funded Measles, Mumps and Rubella (MMR) 'Vaccine' in 2016 as he planned to work on the frontline in the healthcare industry. The MMR vaccine is free. I had nothing to lose, right? A decade of my senior life perhaps.

This 'vaccine' left my body bruised, swollen, sweaty, fatigued and bed bound for days. I recall sharing this toxic tale with a physician – an experienced, decent, PhD-qualified frontline veteran close to the defunct so-called statutory retirement age. Their face and response gave a clue. A coded hint – “some claim that the entire health industry is a scam”. This is a true testimony.

I worked as an economic analyst for four plus years at three of the largest teaching hospitals in England (one) and Australia (two). I worked alongside champion, selfless *frontline* medical professionals who are deeply committed to preserving the quality of all human lives.

I direct theories in this book

The infamous RO Club Plus One.

Their twisted truths shamelessly hides in plain sssssssssssssssssssssight.

The Publication on AIDS Vaccine Research

A LIVING HISTORY OF AIDS VACCINE RESEARCH: PART1 ANTHONY FAUCI

Anthony Fauci has been at the forefront of AIDS vaccine research for decades. When AIDS surfaced in 1981, he, like many other scientists and physicians, was drawn to the mysterious illness, which has now claimed more than 25 million lives—more than the populations of Ghana or Taiwan. Since 1984,

Vials

This book is about a future COVID-19 vaccine. It contains three parts beyond this section, 'Vials'.

This book analyzes themes about vaccines as a lens to synthesize this author's Deep State open-access books catalog.

It is the penultimate volume in this series.

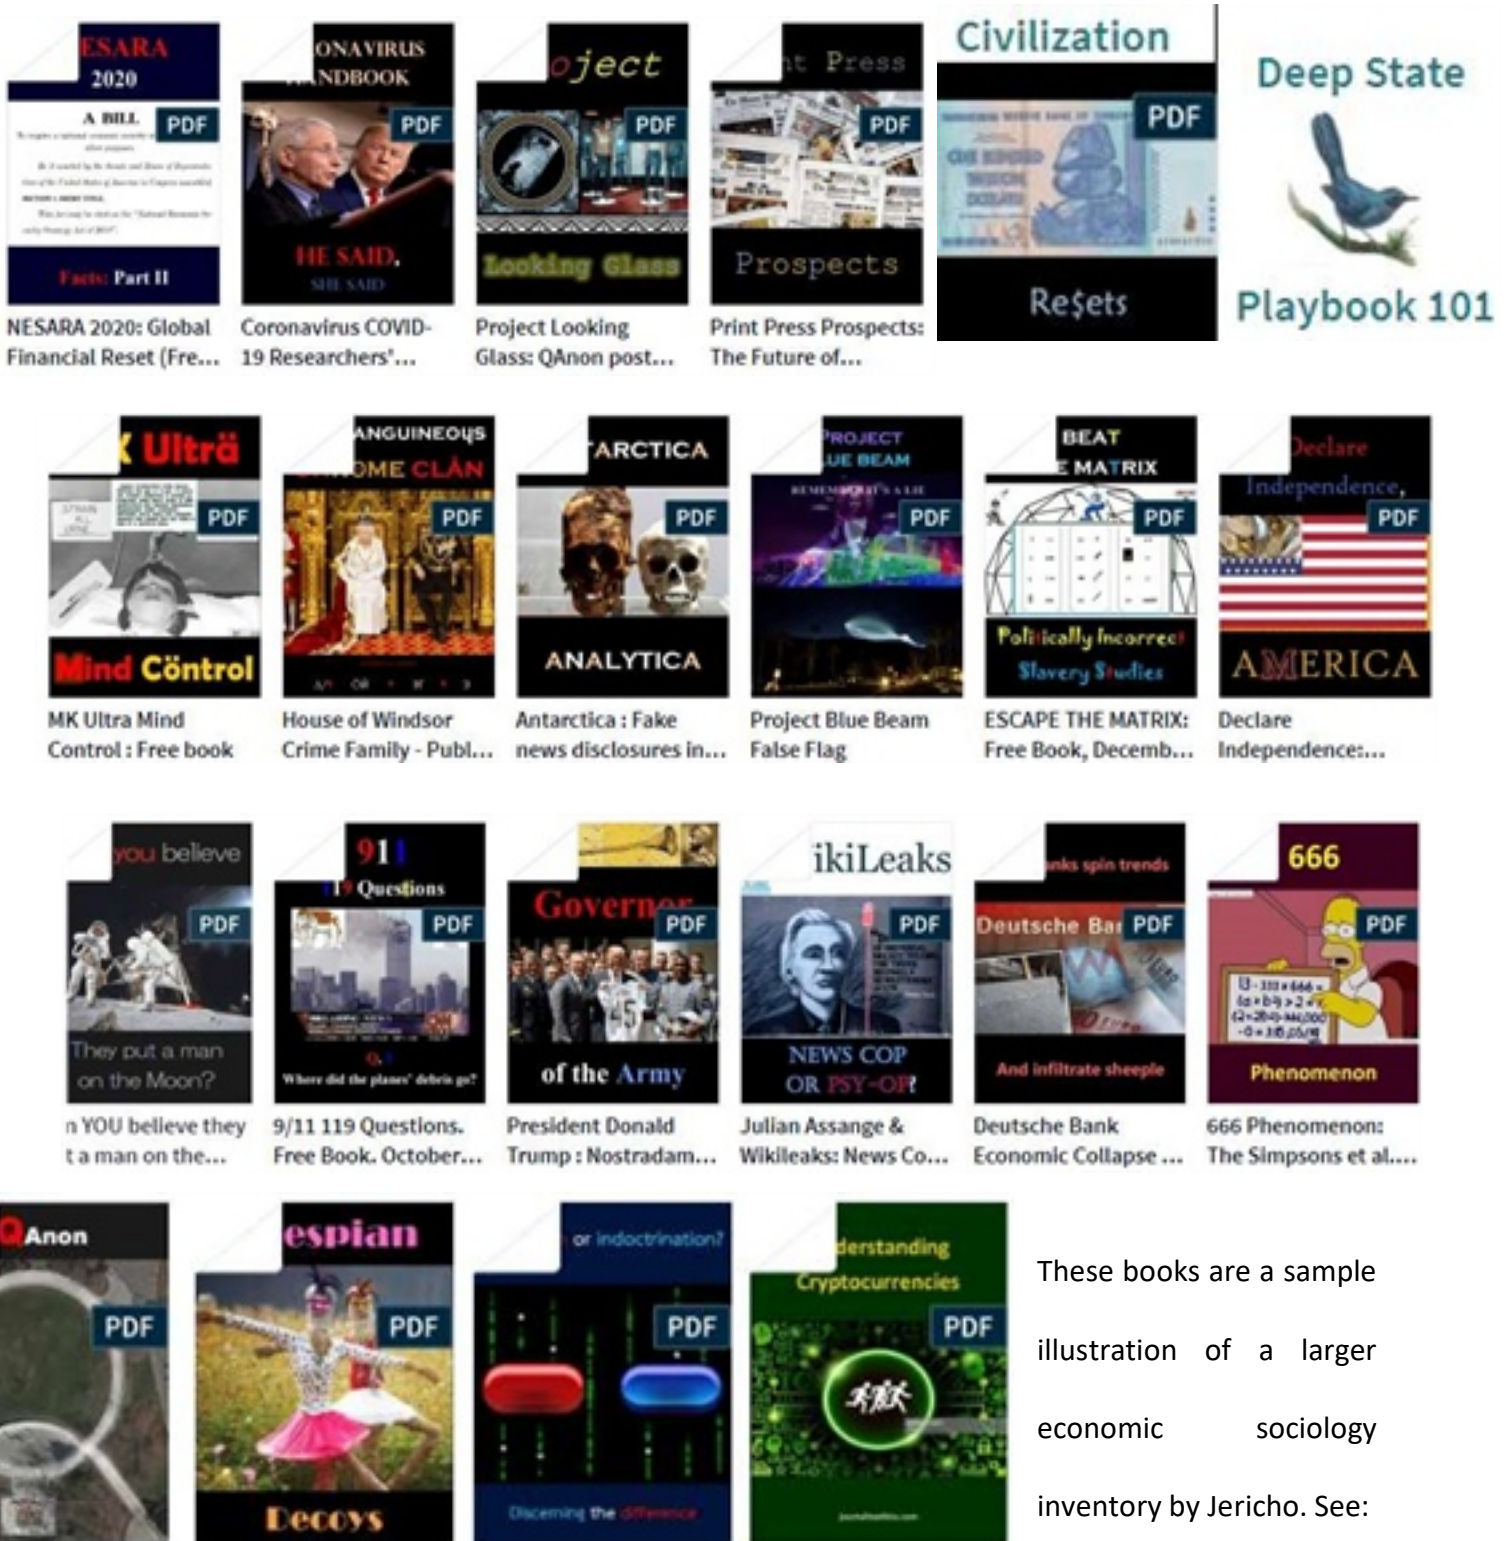

The next segment contains seven sections. It centers on the powers in the shadows who promote and fight phenomena such as "Bill Gates and his vaccine agenda" (e.g. Air, 2020).

Part Three examines impotent puppets and sycophants who shill these dubious vaccine agenda on the frontlines. These include so-called 'educators' and naïve healthcare workers.

'Vermicelli' looks at the two dominant agents who push and resist universal vaccine agenda. The Conservative Christian collective and its allies spearhead this resistance movement. The RO Club, Plus One are their arch opposition.

The final body section, 'Venom', theorizes that the termination of the House of Windsor Crime Family is the trending endgame. The COVID-19 diagnosis of England's Germanic King Charles is the adrenochrome colored flag.

Vaccines

This section merely parrots popular narratives propagated by orthodox Western healthcare courses such as Bachelor of Nursing and Doctor of Medicine courses taught at state accredited colleges and universities. Coursework students are groomed to regurgitate such information as gospel in their written and practical exams. Failure to do so denies them professional registration. Incorporating such bioscience information as part of the *curricula* is not proof that some, most or all information is true. I explore these issues and others in the MK Ultra section of this book.

Please consider these plausible scenarios, that are not automatically mutually exclusive.

- Lab data produced by a leading pharmaceutical company about a vaccine is entirely false – the executives who schemed this publication aim to register a patent that can earn this company billions of dollars in revenue from a vaccine placebo (Currais *et al.*, 2008).
- Academic research about vaccine efficacy promotes false conclusions in error. Future technologies inform healthcare researchers of this problem (*e.g.* Hoffman, p. 228).
- Lab data produced by a pharmaceutical company about a vaccine is false; it is sponsored by a supranational agency that aims to reduce fertility rates (*e.g.* Galalae, 2016).

In-text references above are illustration examples where credible writers talk about such scenarios in terms that are hypothetical, speculative, or supposedly factual. Please visit the open-access resources via this book's references section and read these publications in full context.

MASS NOUN

collinsdictionary.com/us/dictionary/english/vaccine

A **vaccine** is a substance containing a harmless form of the germs that cause a particular disease. It is given to people, usually by injection, to prevent them from getting that disease.

The noun 'vaccine' is of Latin origin. Curiously, this noun shares a base prefix, 'vac' with several Latin words that bear connotations that imply absence. Please consider these examples:

Vacant, Vacuum, Vacillate, Vacuous, Vacation, Vacuole.

Most English language words, including adopted English language words (*e.g.* Latin), that begin with the prefix 'vac' are words that convey connotations about absence. This includes morphs of words in the small list above, such as vacancy and vacate. Please refer to this website list.

Shocking truths about criminality often hide in plain sight. Like the twisted cold-blooded serpent reptile that represents the China-centric World Health Organization on the global stage in its logo.

Are most vaccines money-generating phony placebos?

Perhaps some, most or all vaccines are devoid of net benefits.

Readers may access peer-reviewed scholarly medical literature that offers detailed specifics about how vaccines supposedly work in the general sense and how a specific vaccine such as the Hepatitis B Vaccine works. An open-access (free download) example of both types appear below.

Polio vaccination: past, present and future

Ananda S Bandyopadhyay^{*1}, Julie Garon², Katherine Seib² & Walter A Orenstein²

ABSTRACT Live attenuated oral polio vaccine (OPV) and inactivated polio vaccine (IPV) are the tools being used to achieve eradication of wild polio virus. Because OPV can rarely cause paralysis and generate revertant polio strains, IPV will have to replace OPV after eradication of wild polio virus is certified to sustain eradication of all polioviruses. However, uncertainties remain related to IPV's ability to induce intestinal immunity in populations where fecal–oral transmission is predominant. Although substantial effectiveness and safety data exist on the use and delivery of OPV and IPV, several new research initiatives are currently underway to fill specific knowledge gaps to inform future vaccination policies that would assure polio is eradicated and eradication is maintained.

This writer theorizes that the big pharma vaccine agenda is one of the most sensitive topics on this planet outside of critical matters that deal with strategic military topics such as national sovereignty. One topic may or may not crystalize this view in the minds of readers. I refer to the examination and passing of a Doctoral Thesis published by Dr Judy Wilyman in 2016.

Readers may freely access thousands of media articles and other content that showcases the controversiality of Wilyman's thesis. Her manuscript was subjected to an ultra-rare second examination cycle. Thousands of scholars each year put forward Doctoral theses research conclusions that paritally alter or invert the orthodoxy. Those who don't agree with the findings usually ignore them or pass comment of the reasons for this disagreement and quietly move on.

Abstract

Vaccination policies in Australia need to be scrutinised because the use of a medical

Judy's Doctoral Thesis was an international scandal. Vaccines earn Big Pharma trillions of dollars in revenue every few decades. Their vested financial interest are beyond mere 'high stakes'.

Most medical illnesses are socially constructed. They are politicized to preserve the world order *status quo*. It is obvious that most so-called psychological medical illnesses are fabricated. Their existence varies by time and place. The hilariously named 'Gender Identity Disorder' did not exist on the medical records 100 years ago. Its recent inception has earned armchair psychologists and psychiatrists many millions of dollars in fees. According to the Diagnostic Manual IV, girls who preferred to play with toy trucks and not dolls were diagnosed as mentally sick in the past.

Diagnostic criteria for Gender Identity Disorder

behavenet.com/diagnostic-criteria-gend

These criteria are obsolete. **DSM Version:** DSM IV - TR

(3) strong and persistent preferences for cross-sex roles in make-believe play or persistent fantasies of being the other sex

Those who critically research vaccines outcomes may witness claims that

vaccines cause 'Autism'. I shall allow readers to freely draw their own conclusions about the elements that comprise these fairy tales in official medical literature and casual discourses. As far as this author can gauge, the Diagnostic and Statistical Manual labels people who have quiet, introverted, introspective personality types as being 'mentally sick'. Autism. Whatever that is.

This writer foresees that attitudes towards illnesses may change dramatically over the next decade as mass healthcare diagnosis fraud is exposed. We may collectively see those who author the DSM, set behind the curtain, as the sickest ones. Most who exert power over such manuals and vaccines agendas are those who hold a Bachelor of Nothing alongside their mass cash stash.

Things like Mr. Bill Gates-Rockefeller; Cert. Nothing, Dip. Nothing, B.Nothing, M. Nothing, D. Nothing.

The White House will likely lead or co-lead the way in public discourses and biotechnology developments that concern a global rollout of a future COVID-19 vaccine. A recent high-level political development illustrates this argument. President Donald Trump fearlessly and rightly labelled the discredited World Health Organization as a compromised, biased China-centric shill.

[whitehouse.gov/briefings-statements/remarks-president-trump-vice-president-pence-members-coronavirus-task-force-press-briefing-26/](https://www.whitehouse.gov/briefings-statements/remarks-president-trump-vice-president-pence-members-coronavirus-task-force-press-briefing-26/)

THE PRESIDENT: Look, I feel very badly about the World Health Organization, but it's been a tool of China. It's been, as I say, totally China-centric. You take a look at everything that's happened; they've been wrong. I was all for it at the beginning. What do I know? I walked in, I said, "World Health Organization — isn't that wonderful?" And then you start to see all the mistakes. They didn't want us to close our borders to China — to Wuhan, specifically. They didn't want our borders closed.

During mid-April 2020, media commentators speculated that President Trump would face a severe backlash for his fierce criticism. This did not transpire. An ever-growing number of establishment commentators have publicly expressed their distrust of the China-centric WHO.

It is no coincidence that the Coronavirus COVID-19 scam is globally known by names such as China Virus, Wuhan Virus and CCP Virus.

On May 15, 2020, China's state-owned media monopoly propaganda press agency 'Xinhua' announced that clinical trials for the

Coronavirus COVID-19 vaccine were in progress.

This topic is a work in progress issue when this book went to press. The handbook shown above outlines the bizarre, direct connection between the America's Center for Disease Control & Prevention and Beijing in the development of the Coronavirus COVID-19.

A rarely discussed fact is the long-term operational presence of America’s Center for Disease Control inside China. This presence was slashed from *circa* 47 personnel to 14 staff during the tenure of the Trump Administration.

The Food & Drug Administration manages vaccine approval and regulation in America.

Vaccine Product Approval Process

The U.S. Food and Drug Administration’s (FDA’s) [Center for Biologics Evaluation and Research](#) (CBER) is responsible for regulating vaccines in the United States. cdc.gov/vaccines/basics/test-approve.html

The sponsor of a new vaccine product follows a multi-step approval process, which typically includes

- An Investigational New Drug application
- Pre-licensure vaccine clinical trials
- A Biologics License Application (BLA)
- Inspection of the manufacturing facility
- Presentation of findings to [FDA’s Vaccines and Related Biological Products Advisory Committee](#) (VRBPAC)
- Usability testing of product labeling

The FDA is the agency to watch with concerns to the development of a COVID-19 vaccine if this event transpires. Historically, this agency has

enjoyed close ties with big pharma – a multi-billion-dollars profits industry, *per annum*.

Institutes

The vaccine development process, as overseen by government authorities, is rarely managed hands-on by governments. They control this process by funding the agents they outsource using taxpayers' money. Not all act in good faith. Some collaborators know in advance what agenda they are being paid handsomely to construct. Examples of institutes that create vaccines include:

- University research institutes
- Private research bodies such as the Pirbright Institute, who invented the Coronavirus
- Government agencies.

These images are merely neutral illustration examples of the three classes listed above.

Fresh on the heels of the first data from human tests of its Covid-19 vaccine, [Moderna](#) sold \$1.3 billion worth of stock on Monday at a price of \$76 a share. That's a fourfold rise from price where the biotech's stock started the year, and a market value of \$30 billion for a company that has yet to sell its first product.

What investors are betting on, for Moderna (ticker: MRNA) and others developing vaccines against the SARS-CoV-2 virus, is that a third of the developed world's population will get vaccinated every year. That could amount to a \$10 billion annual business, at an estimated price of \$30 per vaccination. At higher prices, Covid vaccine revenue would be bigger still.

Vaccine fraud is a phenomenon that may exist in theory and practice. The article shown overleaf in extract form, is an example of vaccine fraud that involves one person. Vaccine fraud may involve a cartel of influential parties. This may include governments and cronies on their payroll.

The case of Dong-Pyou Han illustrates the uneven nature of penalties for scientific misconduct.

Sara Reardon

01 July 2015 | Updated: 01 July 2015

Biomedical scientist Dong-Pyou Han (centre) confessed to fabricating and falsifying data on an HIV vaccine.

Charlie Neibergall/AP/PA

Rare is the scientist who goes to prison on research misconduct charges. But on 1 July, Dong-Pyou Han, a former biomedical scientist at Iowa State University in Ames, was sentenced to 57 months for fabricating and falsifying data in HIV vaccine trials. Han has also been fined US\$7.2 million and will be subject to three years of supervised release after he leaves prison.

His case had a higher profile than most, attracting interest from a powerful US senator. Han's harsh sentence raises questions about how alleged research fraud is handled in the United States, from decisions about whether to prosecute to the types of punishments imposed by grant-making agencies.

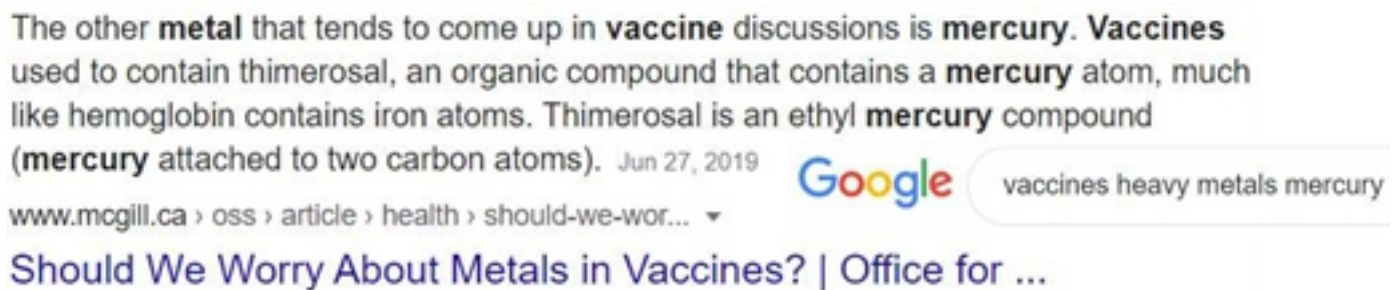

The most sinister example of vaccine fraud is the purposeful invention of one that is designed to deliberately harm recipients. As far as this writer can gauge, there is no proven case in history where it has been proven that a government approved vaccine was used to purposefully maim or kill recipients. Claims such as this example retain 'folk lore' status. They spin gossip, not facts.

The dominant theme among the deliberate ‘vaccine poison’ discourses is the claim that micro or liquified carcinogenic heavy metals are purposefully inserted into some/most vaccines. Heavy metals cannot be metabolized. They accumulate and promote a slow, subtle death. References to mercury laden vaccines are common. This image below is the first response provided by Google to the search string shown. This is the message Google wants readers to accept as fact.

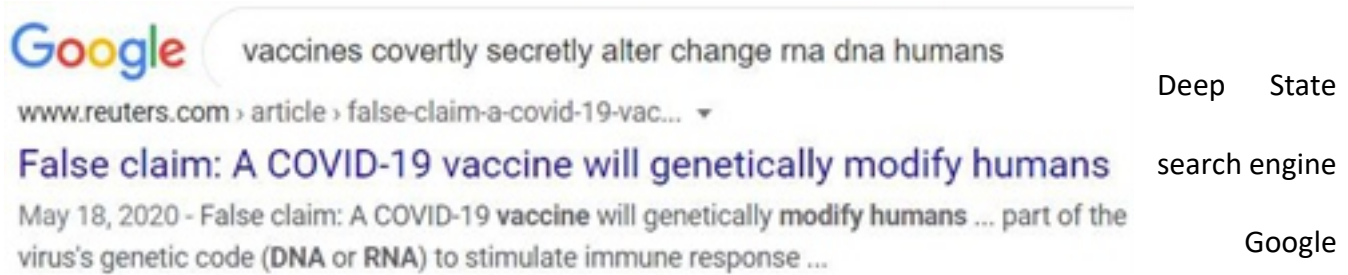

Spiritually ill McGill University was a lead fake university partner that covertly brainwashed, drugged, and tormented patients in its toxic MK Ultra Mind Control crime project (CTV, 2018).

Around half of all vitamins and supplements sold in America are coated with titanium dioxide. Titanium is famous for its unparalleled resilience. The US Space Shuttle Fleet was coated in titanium. In this author’s frontline deep research opinion, America’s working class are the most attacked social group on this planet. Criminal corporations such as Bayer and Monsanto poison drugs and food supplies with their toxic additives such as aluminum, pesticides, and GMO Frankenstein foods. Willful genocide.

RNA/DNA

A popular theme in critical vaccine discourses is a claim that some, most or all vaccines covertly aim to change the Ribonucleic Acid (RNA) and/or the Deoxyribonucleic Acid (DNA) structure of recipients to advantage elites. These target populations may include humans and animals.

explicitly acknowledges that such debates exist. It does so by ranking #1 a news article published by Deep State fake news global powerhouse Reuters. This article claims to debunk such theories in its search engine title. Offering the answer in the title smacks of mind control desperation.

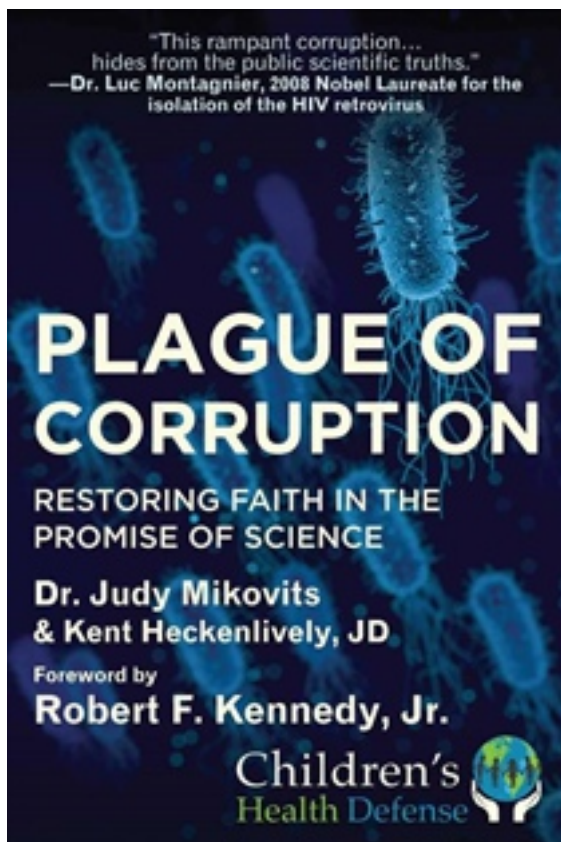

Mandatory vaccines are popular in armed forces. This writer suspects that such vaccines make soldiers stronger and fitter in the short term. Armed Forces don't want to murder their soldiers today or within a decade. Perhaps such vaccines reduce the life expectancy of the recipient in their golden years. This may reduce pensions payable to eligible veterans.

Regarding the paragraph above. Do you think that it is dangerous for this author to offer such speculation based merely on a hunch as opposed to an analysis of clinical data? Do you expect that military forces would allow independent researchers to have full access to their vaccine data?

Compartmentalization

A common theme among the defenders of vaccines is the claim that it is impossible to deceive the millions of live-loving care professionals who support and administer vaccines. This argument is flawed. I merely offer two fair counter arguments among the many that exist on this page.

Compartmentalization refers to the delegation of a project's sub-parts to isolated individuals and

teams who work on micro components. A rogue military General, a procurement executive, may source 50 steel and chemical components from 50 independent suppliers in 50 countries. These 50 suppliers do not realize that this rogue officer plans to covertly build a bomb, solo. Their contribution to this project, sending supplies, is too small and geographically isolated to detect this subversive scheme. The same analogy applies to frontline medics. Lead vaccine researchers typically have a PhD, postdoctoral training, work in laboratories and analyze raw lab data. Few senior frontline Medical Officers (M.D.) fit this description.

Insiders who expose vaccine fraud may be assassinated by the RO Club, terminated from their employment, imprisoned or a combination thereof. Deep State search engines such as Google, and their fake news friends promote webpages that discredit healthcare fraud whistleblowers.

Who is Dr Judy Mikovits?

Medics may be the most difficult brainwashed agents to deprogram. Medical Schools groom students to obediently follow procedures. Lawsuits, dismissal, deregistration, public humiliation, and incarceration are penalties imposed on those who dare to escape the mad medical matrix.

MK Ultra (Jericho, 2020b) discusses nine examples of mind control that may be covertly imposed on docile audiences such as naïve students. These techniques aim to create altered states of consciousness. ‘Brainwashing’ implants mind control lies in unsuspecting victims’ memories.

However, an interesting viewpoint surfaced, and it was something that you wouldn't typically hear at work – nurses across cyberspace vocalized their stance against vaccines.

In the comments, many nurses proudly stated their profession and their opinion, letting the internet know that they have been educated in their field and may even administer flu vaccines during their workday, but do not practice vaccination in their own personal lives. Other nurses who felt similarly jumped into the related thread with a "me too!" and others told stories of making their social media presence untraceable to their real identity due to threats of being reported to the Board of Nursing because of their vaccination beliefs.

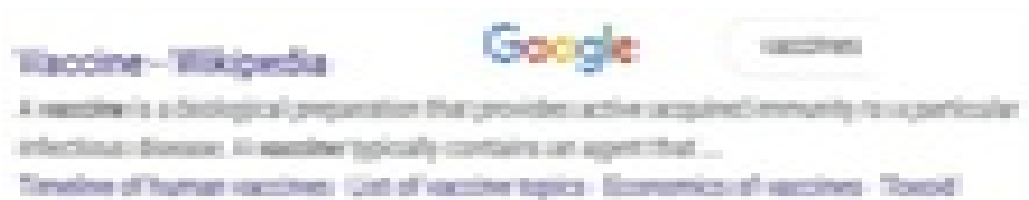

Algorithms

Most of what we access online is determined by Deep State operatives who control search engine algorithms. Alphabet-Google and its monolith Google search engine are a prime example. The top 100 results put forward by this simple search are not random. Vaccines is a top 10 controversial topic. These results are based on Google's agenda. Top 4 responses:

1. www.cdc.gov/vaccines/index.html

2. www.vaccines.gov/

3. Wikipedia

4. www.who.int/topics/vaccines/en/

Responses 3 and 4 are Deep State operatives. The CDC is currently under the control of the Trump Administration. It is a positive that this administration is openly not pushing for mandatory COVID-19 vaccines. This policy goes against the grain of prior administrations who promoted policies that awarded trillions of dollars in revenue to big pharma players such as Pfizer. In this eyes of many, Wikipedia is a corrupt, partisan, Deep State, agenda-pushing, fake database.

Science

Being automatically 100% pro science or 100% anti science is probably disingenuous. This view is merely this author's humble opinion. The truth probably falls somewhere in the middle. A mammoth amount of elementary chemistry, physics and bioscience is obvious to all but the fanatics. Your washing dries faster on a warm, dry, windy day than it does on a hot, dry day (same conditions) that is devoid of wind. Many people who are deeply skeptical of science are not anti-science. We are cautious about accepting *any* scientific proof as 'gospels' of fact, because of problems that may undermine any existing scientific truth or new, emerging scientific knowledge.

Major problems that undermine all so-called 'knowledge' research are:

1. Accidental errors.
2. Advancement in knowledge over time.
3. Politicization and falsification.
4. Lack of universality – Exceptions to every rule.

A real-life open-access scholarly example of these four points, in the vaccine science context, is discussed overleaf. These problems are not mutually exclusive. For example, a Project Lead Vaccine Researcher may make errors in the laboratory. This occurs because s/he is under pressure by their sponsor, to produce authentic research that has political implications – *i.e.*, debunking the orthodox position.

Vaccines: SA's immunisation programme debunked

South Africa (SA)'s high-priority, underfunded Expanded Programme on Immunisation (EPI) is understaffed and close to rudderless, with

Problem	Explanation and real-world example
Errors	Dozens of common accidental errors may easily creep into elite research. Examples include aggregation mistakes and mislabeling test tube samples. Vaccine research example: Bajpain <i>et al.</i> (2015)
Advancement	Most scientific theories are revised over time. For example, the Periodic Table of Elements continues to grow. Vaccine research example: Muzzi <i>et al.</i> (2005)
Falsification	Much research deliberately fabricates or exaggerates data results to pursue an agenda, such as the commercialization of a profitable patent. Vaccine research example: Rao & Andrade (2011).
Universality	Not all scientific laws are universal – including ones that are marketed as universal. The speed of gravity on Earth is supposedly 9.807 m/s^2 . This fact only holds true if factors such as air and magnetism do not obstruct an object. A flat piece of paper falls slower than a brick, <i>ceteris paribus</i> . Vaccine research example: Chung (2014)

In the eyes of this author, a doctoral research graduate, all research is about trust and nothing else. I could have earned my doctorate by secretly inverting my interpretation of the data 180 degrees to argue the opposite. I did not do so and published an honest interpretation of my data. This discovery was shocking. Most universal formulae are mythical.

18 Here is wisdom. Let him that hath understanding count the number of the beast: for it is the number of a man; and his number is Six hundred threescore and six.

The point of this page does not aim to promote the truth of the Christian New Testament of a belief in a so-called 666 Mark of the Beast. It merely highlights a factual phenomenon. The majority of America's 315 million residents subscribe to Abrahamic faiths. The massive (many thousands) of cogent articles that connect the Coronavirus COVID-19 false flag scam to a mandatory government vaccine agenda is noteworthy.

UBI

An ever-growing number of independent researchers and civilian/independent journalists claim that Universal Basic Income in America will be ushered in via a mandatory Coronavirus COVID-19 vaccine. Thus far, these commentators are limited to early-phase tentative developments which are occurring in America's political economy and society. The blatant heavy promotion of the COVID-19 vaccine agenda in the fake news mainstream media is supposedly a strong sign. House of Windsor Committee 300 Bloomberg news agency is pushing this agenda.

Under cover of COVID-19 lockdowns, can we expect to see cash being pushed right to the margins when countries emerge from the current crisis (for instance, in an ongoing pandemic culture of fear and paranoia, it would be easy to convince people that notes and coins are potential transmitters of disease, or with mass unemployment we may have universal basic income schemes linked to digital payment systems)?

Rollout

Many thousands of news platforms connect the Coronavirus COVID-19 event to the experimental rollout of 5G cellphone/data towers in Wuhan Province, China and Britain. This page merely mentions this phenomena to guide those who seek to freely connect the dots. There are several competing and partially overlapping theories. This rich topic is worthy of a separate handbook.

A popular theory in this category is the opinion, supposedly formed by serious research, that the COVID-19 mandatory vaccine agenda and the 5G rollout agenda are strongly related. A mandatory vaccine may contain radioactive particles that interact with 5G radio waves. This combination serves multiple agenda. These goals overlap with the long-term momentum that aims to form a One World Government that oversees a microchipped, human cattle slave class.

It is a remarkable coincidence that the Coronavirus COVID-19 outbreak originated in Wuhan, China around the same time that Beijing activated its 5G human guinea pig cell tower trials.

Approximately 10,000 **5G** antennae were installed and **activated** in **Wuhan** in 2019, with ...

From Beijing's perspective, heavily populated Wuhan Province is an ideal place to launch 5G. Its historical One Child Policy suggests that Beijing considers China to be seriously overpopulated. China's population has grown by more than 100 million since this eugenics policy was abandoned.

Depopulation

State sponsored population control, via covert mass murder, is known by the noun 'Eugenics'. Willful sterilization of women via toxic vaccines is an example of such interventions. It is easy to find articles in recognized publications that discuss observed connections between government certified vaccines and the sterilization of females, including children. This is an example.

There is evidence that agencies that control national finances and supranational budgets act to reduce the human population. Bill Gates – who is qualified in nothing, is often cited as the arch evidence that the corrupt World Health Organization engages in depopulation, mass murder agenda (See Annex 1). Focusing on the Bill Gates-WHO alliance is logical. Gates is the largest private contributor to the WHO. He is the second largest donor after America (WHO, 2019).

Enslavement

The enslavement of the remainder of the global human population is likely the endgame of the RO Club Plus One. Evidence that shows humanity has become enslaved to banks and virtual monopoly corporations such as Amazon and Uber are overwhelming. Household debt and unemployment rates increase year-on-year as the wealth of corporate criminals, House of Windsor Crime Family fronts, such as Jeff Bezos and Mark Zuckerberg increases exponentially. MK Ultra mind control bug eyes Jeff Bezos earns America's average *annual* salary in 35 seconds.

Approximately 100,000 Californians sleep on the street or in a homeless shelter or their vehicle. These figures grow annually as the wealth of America's top 0.01% increases exponentially.

This humanitarian disaster has been socially engineered by the RO Club Plus One.

Regina

There is a massive, ever-growing body of evidence that suggests that the House of Windsor Crime Family is a phony, non-royal bloodline plant. This crime clan is being covertly dismantled since after President Trump took office in 2017. Britain's people have been under heavy MK Ultra mind control for more than a century. School textbooks and news are controlled by House of Windsor assets, such as the British Broadcasting Corporation (BBC) – a fake news propaganda outlet.

It would shock tens of millions of British to discover 'overnight' that Buckingham Palace has been occupied by a Nazi Germanic War Lord pedovore crime family. This subsection merely offers a few examples of evidence that may indicate that the House of Windsor Crime Family is being covertly dismantled in a manner that gently awakens the British Commonwealth slave empire.

It is a remarkable coincidence that Britain's highest-ranking political leaders were diagnosed with the Coronavirus. This is likely a gentle way of gradually informing the public that these infected people are medically compromised, *i.e.* unfit to hold office long term. It is unprecedented for the 'British' Royal Family to publicize deeply private details about the health of its clan members.

The Queen Elizabeth (deceased *circa* 2016) body double decoy has been publicly extracted ('QUITS') from Britain's Buckingham Palace. This Palace is the symbolic nerve center of the Saxe-Coburg & Gotha (House of Windsor) Germanic Clan.

A Royal Coat of Arms has been missing

from Buckingham Palace's front gate since October 2019. It remains vacant at early June 2020.

Andrew Saxe-Coburg & Gotha has been banished from Pedovore Palace for partnering with a child sex trafficking boss. Harry and Meghan have also been extracted from Pedophilia Palace. Dirty Harry's Venetian Black Sun diplomacy horned hand signals is unwelcomed in Britain. Sicko.

British Royal Institutes and their associates have a long association with Vaccine research. The Pirbright Institute (2015) patented the Coronavirus. QinetiQ likewise has its tentacles entwined in dubious vaccine research. The doubly emphasized Q in its logo may refer to its arch sponsor and protector, Queen Elizabeth Saxe-Coburg & Gotha.

THE Royal Borough of Windsor is not the place where we should expect to find opposition to the vaccination law. Her Majesty has set her subjects an example of obedience by having all her children vaccinated, and her grandchildren doubtless have gone through the same ordeal. The Queen's medical advisers do not, however, we are told, trust to arm-to-arm vaccine; and when, during the severe small-pox epidemic of 1871-2, both vaccinated and unvaccinated succumbed to the pestilence to the number

admit it, but the mother and the father says so, and that's what I 'ear talk." "Perhaps you don't believe much in vaccination?" said I. "No, I don't. Dr. C., the public vaccinator, has been after me a good many times to be vaccinated, because he says there's a good deal of disease about, and you ought to be done. 'But, doctor,' I says, 'I've been knocking about a good many years, and I never caught nothing; besides,' I says, 'I have to get my living, and have no time to lay by while I get through it.'" "Do the people in Windsor generally accept vaccination?" "Yes, most of 'em do, and if the doctors can't persuade 'em to have it done they don't make no fuss about it." "Did you ever hear of any parent being prosecuted for non-vaccination?" "Not in Windsor."

A lady bookseller in Pescod-street, in reply to my question if she knew of anyone interested in the vaccination question, said, with unconscious irony. "Yes, all the doctors are interested."

The National Childhood Vaccine Injury Act (NCVIA) of 1986 (42 U.S.C. §§ 300aa-1 to 300aa-34) was enacted in the United States to reduce the potential financial liability of vaccine makers due to vaccine injury claims.

The legislation was aimed at ensuring a stable market supply, and to provide cost-effective arbitration for vaccine injury claims.

Under the NCVIA, the National Vaccine Injury Compensation Program (NVICP) was created to provide a federal no-fault system for compensating vaccine-related injuries or death by establishing a claim procedure involving the United States Court of Federal Claims.

Why is Bill Gates often cited by media, NGOs and governments as an authority on immunology, epidemiology and vaccines? Gates does not hold an earned Diploma or Degree. It is fair to question whether Gates invested billions of dollars to purchase his fake public authority persona. Gates has publicly argued for the need to reduce global CO₂ emissions to zero. This advice from a college dropout who is qualified in nothing is insanity. Plants and trees naturally release CO₂.

$P \times S \times E \times C = \text{CO}_2 \text{ (carbon dioxide output).}$

P = Population

S = Services used

E = Energy consumption

C = CO₂ created per Energy unit (E)

According to Gates's formula, reducing the human population reduces CO₂ output. Bill Gates Senior was an Executive Board Member of Planned Parenthood – a population control entity.
