

Gamified DeFi ecosystem

Smart NFT assets. Multichain. Cross-chain. High profit yield farming.

Gamified DeFi ecosystem

DeFi users want all apps in one place.

We provide multi-chain DEX, cross-chain bridge, traditional farming and autofarming, and bind it in one ecosystem with gamified NFT farming. Because everybody loves playing.

Our mission:

To provide a simple instrument for basic income.

The material in this presentation has been prepared by Gravis Finance (Gravis) and is general background information about Gravis' activities current as at the date of this presentation. This information is given in summary form and does not purport to be complete. Information in this presentation, including forecast financial information, should not be considered as advice or a recommendation to investors or potential investors in relation to holding, purchasing or selling securities or other financial products or instruments and does not take into account your particular investment objectives, financial situation or needs. Before acting on any information you should consider the appropriateness of the information having regard to these matters, any relevant offer document and in particular, you should seek independent financial advice. All securities and financial product or instrument transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk.

Key problems of DeFi mass adoption:

Assets are spread between networks

It's hard to consolidate all your assets in one place, be it single DeFi app or single blockchain.

High transaction fees in popular networks

When a network becomes popular its commission rise up to x100 times. Low-value transactions become detrimental.

High entry threshold

People without sizable assets can't expect high income. People with no assets might never get any income at all.

Unorganized and confusing NFT market

Most NFTs look like useless digital art with no clearly defined value. Income size from such assets can't be steadily predicted.

Rug pulls and poorly calculated tokenomics

DeFi products with ridiculously high APRs are usually a scam or a pyramid. Bad math models can bury even promising projects.

Our solutions:

Multi-chain DEX

Trade your assets on any supported blockchain using only one DEX.

Cross-chain bridge

Easily transfer your assets to a lower-fee blockchain.

Gamified NFT farming

Play-to-earn model allows any users to exchange their time for valuable assets.

Smart NFTs

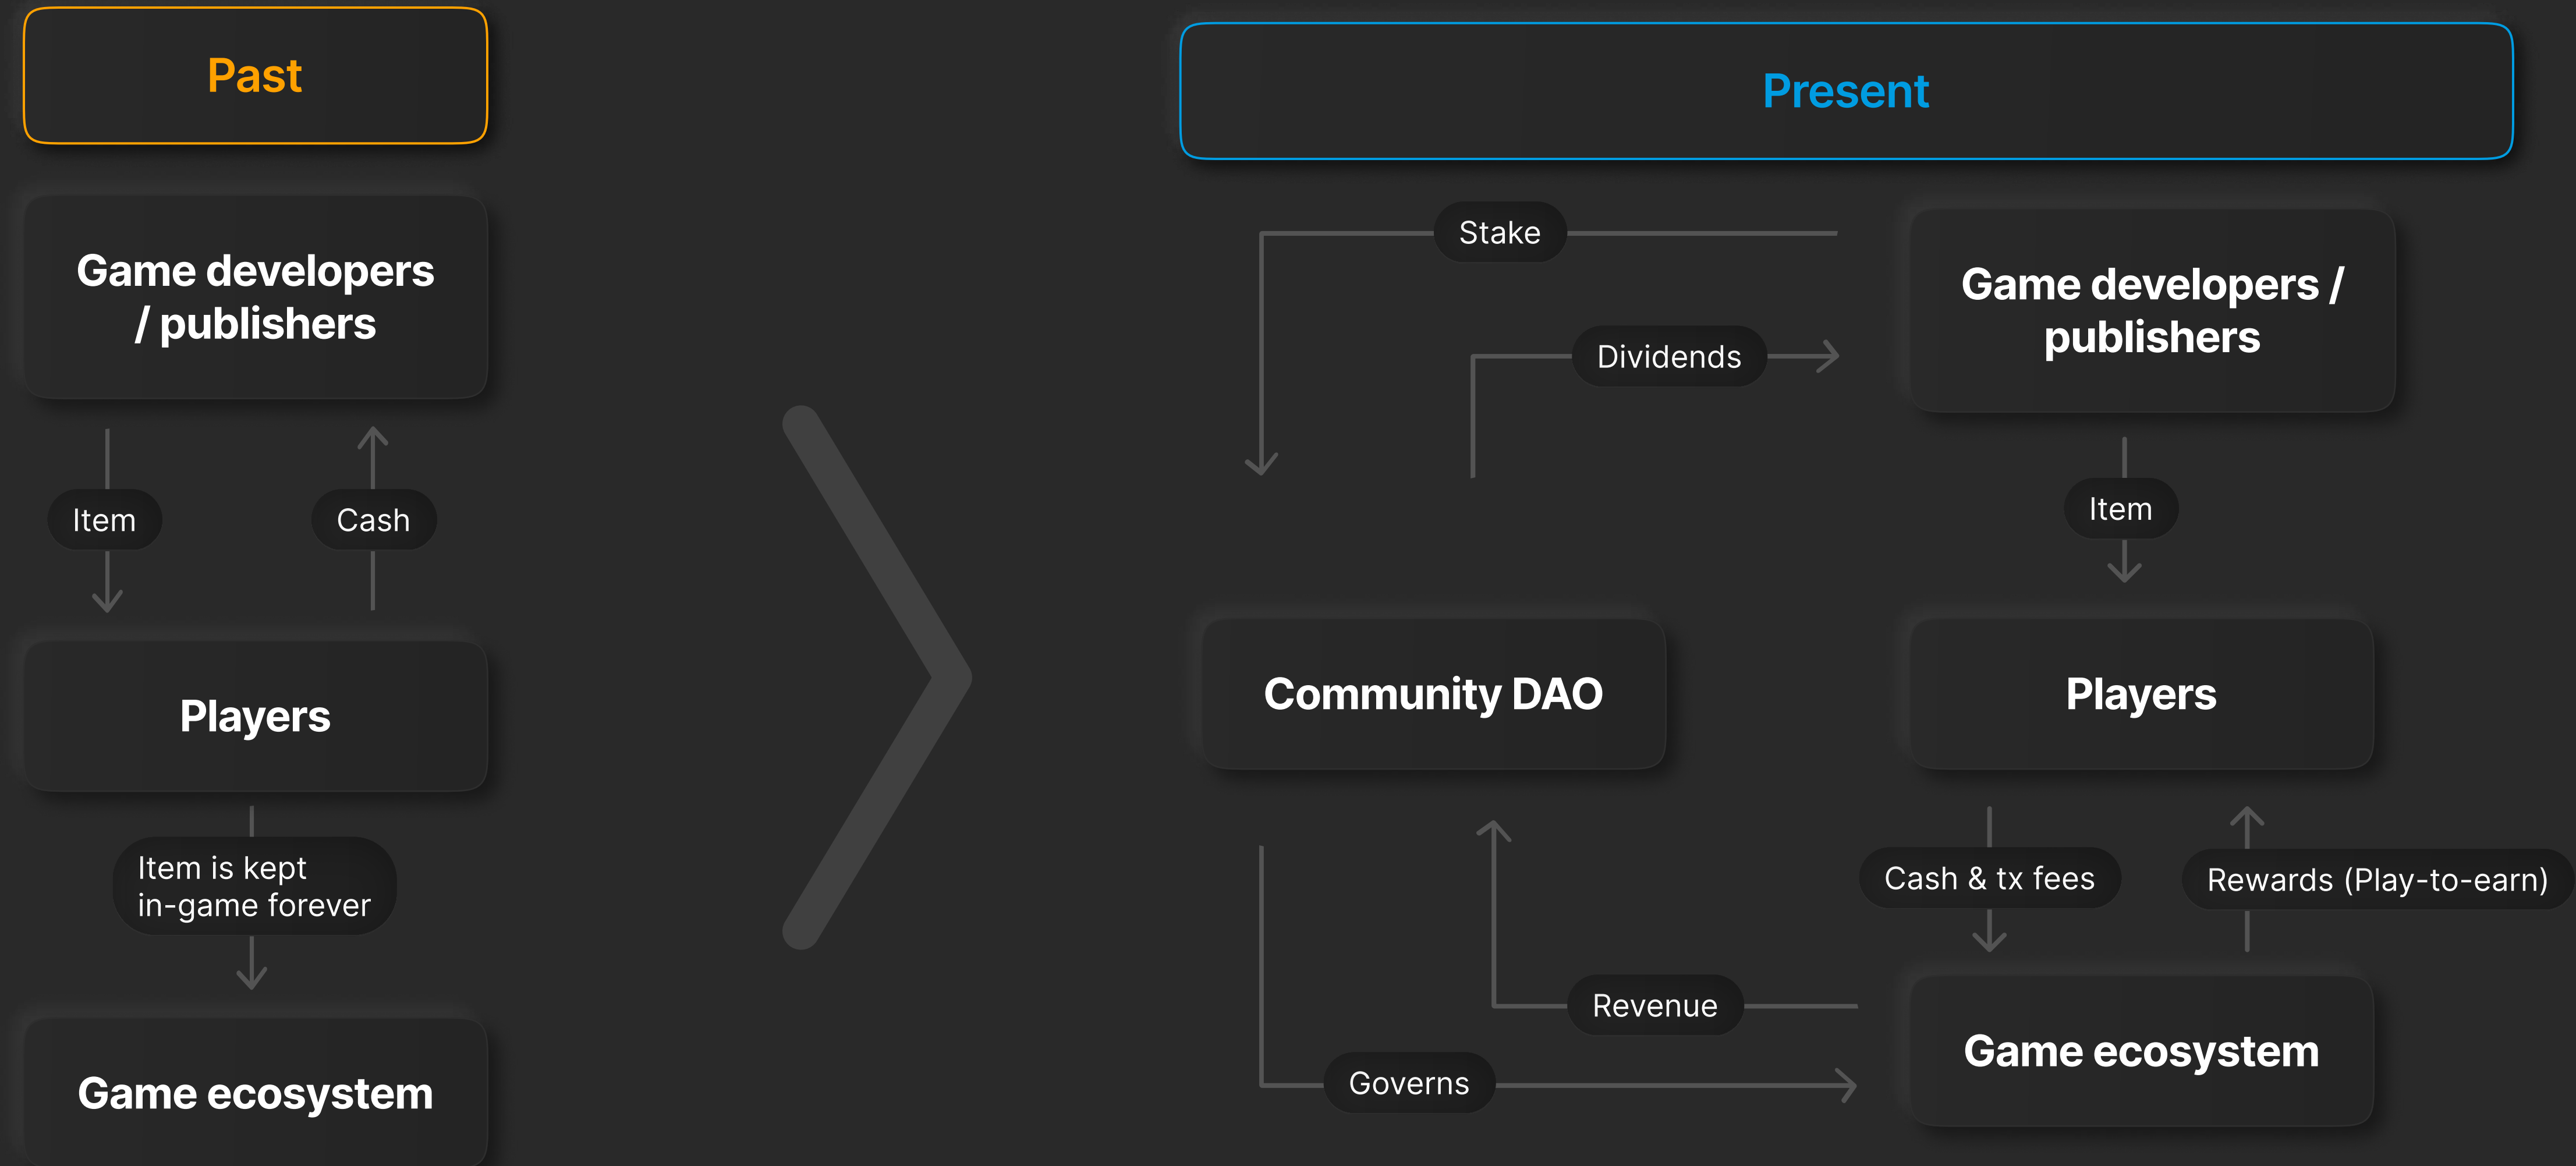

Our NFTs have clearly defined uses inside our products as well as collectible value.

Carefully calculated math

We build our tokenomics on math models with long prognostic range.

Shift in value

Value is no longer accrued to only just the game developer / publisher

Global gaming market

3.1 billion
players in 2023

\$168B
in game items

ARPU \$62

GRVS

Platform's native governance token.

GRVS holders form part of Gravis Finance's decentralized organization and can help shape the development of the platform — such as by deciding how treasury funds should be spent or how the ecosystem fund is allocated.

Also, GRVS can be used to buy premium in-game items such as unique ship skins, elite-tier equipment, or even asteroids.

GRVX

Earned by playing the game and as a reward from staking/farming/autofarming.

Can be used to buy in-game assets, such as loot boxes, characters, etc.

Is a cross-chain bridge currency that can be exchanged for any asset in any supported network.
