**To:** Adam Mazzocchetti adam@spqrtech.ai  
**Cc:** JAIR Editors editors@jair.org

Dear Adam Mazzocchetti,

Thank you for submitting your paper to JAIR. However, I regret to inform you that the paper does not meet our submission requirements. JAIR's Editorial Charter (available at <https://jair.org/index.php/jair/about>) states:

"The Journal of Artificial Intelligence Research (JAIR) is dedicated to the rapid dissemination of important research results to the global artificial intelligence (AI) community. ... Articles published in JAIR must meet the highest quality standards, as measured by originality and significance of the contribution, and the clarity of exposition."

At its current stage of development, however, your submission does not meet the requirements for JAIR. At present, the work is too preliminary and lacks the theoretical/conceptual basis and elaboration necessary for a JAIR article. I suggest these ideas can be developed through workshop and conference submissions.

Please note that this letter should not be taken as a statement regarding the quality of your research. The paper has not been reviewed. This letter is based on an editorial decision that the submission does not meet the requirements for JAIR.

We thank you for your efforts in preparing this submission, and hope that you will find an appropriate forum for this work.

Sincerely,

Mykel Kochenderfer

Editor-in-Chief, JAIR

AM

Dear Professor Kochenderfer,

Thank you very much for your prompt and considerate response to my submission.

I appreciate your editorial feedback and have taken your comments on board regarding the need for a stronger theoretical foundation and a more fully developed presentation. In light of your suggestions, I have undertaken a substantial revision and expansion of the manuscript, elaborating on the theoretical framework and providing more comprehensive empirical validation.

While I understand that the paper was not selected for further consideration at JAIR, I wanted to express my gratitude for your time and for the guidance provided. The editorial process has helped clarify the direction of my research, and I hope the work will make a meaningful contribution to the broader AI community as it develops further.

Thank you again for your consideration.

Best regards,

Adam Mazzocchetti
