

SUPPLEMENTARY EXHIBIT BW/1

COVER PAGE

IN THE HIGH COURT OF JUSTICE

KING'S BENCH DIVISION – MEDIA AND COMMUNICATIONS LIST

Claim No: KB-2025-004650

Description: Screenshot of my Medical Note Evidence from 11 June 2026, confirming my attendance, the clinical findings, and the diagnosis of severe environmental stress. Plus, photos of additional evidence and information concerning ongoing and escalating harassment, witness intimidation and misuse of private information.

Exhibited to: Witness Statement of BW dated 19 June 2026

EXHIBIT BW/1
**Medical Evidence of Distress Caused By Ongoing Severe Witness
Intimidation, Harassment and Mass Misuse of Private Information**

EVIDENCE OF MEDICAL EMERGENCY

1. Incident Overview

- **Date of Emergency:** 11 June 2026
- **Emergency Service Provider:** Hillingdon Hospital Emergency Department

2. Clinical Summary

- **Presenting Symptoms:** Severe chest pains, acute shortness of breath, dangerously elevated heart rate, and hypertensive crisis directly induced by acute situational stress (witness intimidation).
- **Medical Intervention:** Attended the A&E, ECG administration and blood test.

Dear R SARWAR

Name: WITTAYA AMPONPUNT, BUPPHA
Gender: Female
Address: [REDACTED]

Previous Emergency Department attendances in the last 12 months: 1

Your patient attended the Emergency Department on: 11/Jun/2026 13:36:00

Source of Referral: Other Hospital-Hillingdon

Incident occurred at: Medical / clinical area

Seen by: Zena Putris

Presentation:

Brief Summary:
Requested Actions for GP: patient seen in QED

Patient presented with 2 weeks history of intermittent left sided chest pain , described as sharp pain , sometimes radiating across the chest or left arm , sometimes associated with palpitations and SOB. No history of fever/cough/cold. Pain is worse in the morning when waking from sleep when she feels tightness, pain is not related to exertion. Patient has been having lots of stress where she lives , as she lives in HMO accommodation and there is problems with one of the house mates who wants her to leave. Patient otherwise eating and drinking well, no urinary symptoms , suffers from constipations. Patient is pain free at the moment. No menstrual periods for few years

Person Name WITTAYA AMPONPUNT, MS
BUPPHA

Caption: This supplementary evidence confirms that on 11 June 2026, I required emergency medical evaluation at an A&E department due to acute physical symptoms induced by ongoing environmental harassment within the accommodation. The attached note confirms the objective existence of this severe stress, which directly threatens my physical well-being.

The A&E Discharge Summary: The official hospital note confirming my attendance, the clinical findings, and the diagnosis of severe environmental stress.

While the attending clinician confirmed that my physical symptoms are driven by acute environmental stress within my shared accommodation, the medical note omits the specific, primary trigger of this distress. This stress is caused by continuous, daily exposure to high-impact noise harassment—specifically, the violent slamming of the door adjacent to my room—which has directly induced the sharp, persistent chest pain that required emergency hospital evaluation.

Also, now, each time someone violently slams the main door next to my room shut, I immediately feel the onset of sharp left chest pain and palpitations.

The attached medical note confirms the objective existence of acute, stress-induced physical symptoms requiring emergency hospital evaluation on 11 June 2026. The underlying environmental trigger—deliberate, high-impact noise harassment—is documented throughout my injunction application bundle submitted on 9 June 2026, which the systemic domestic framework has failed to fully record.

Furthermore, while I was waiting to be seen in the waiting room at the hospital, the staff there also occasionally walked right out of a room or from round the corner to startle me. This tactic is used in every place I go, and even in Uxbridge Jobcentre, where I have to attend my appointments. I have also mentioned this in my injunction application bundle submitted on 9 June 2026. Particularly, whenever I try to assert my rights or even just to go to hospital like today.

This strongly suggests that the Respondents, especially the Primary State-Actor Respondents, both known and unknown, have also infiltrated this hospital and got the staff here to participate in the harassment campaign against me - either knowingly or unknowingly. They influence every place I go to participate in the harassment campaign against me. Clearly, there's a pattern of behaviour and a misuse of power going on.

Everything I said to the nurses and doctors during the assessments of my chest pain and chest palpitations, also appeared to be passed onto the Primary State-Actor Respondents immediately. Because it's being reflected back to me in real-time via ads and videos on YouTube, as if my confidential and sensitive information had instantly been passed onto social media platforms and other places to instruct them to show ads or videos that echoed my confidential and private information in real-time. Because I went online to kill time, while I was waiting to be seen, and therefore saw how my confidential information seemed to be leaked in real-time. This is not an isolated incident either. It happens daily in which my private, sensitive and intimate material and information appears to instantly be transmitted to third parties. These

third parties then reflect it back to me via various means such as via social media posts, advertisements.

They even seemed to send fake patients in there as well, pretending to complain about their symptoms that were similar to mine and what I had just said to the nurses and doctors, strongly suggesting once again that the hospital staff might have immediately passed my confidential information and medical records onto the Primary State-Actor Respondents for malicious purposes. They might be unaware of the ulterior motive behind it that it would be used for malicious purposes, such as to violate my privacy and to harass me.

At approximately 13:57 pm, immediately after the nurse had performed an ECG on my chest and pulled my top down after finishing it (I didn't wear a bra), I heard someone cough outside as if to convey surveillance or voyeurism via CCTV in that room as well. Because this is not the first time that they have given me hints almost everywhere I go, to let me know that CCTV cameras have also been misused for malicious purposes, such as to sexually abuse/humiliate me everywhere I go, or that hidden cameras have also been unlawfully installed in public sectors or private sectors to violate my privacy and to sexually harass me everywhere I go - even in public bathrooms.

For these reasons, the **Hillingdon Hospitals NHS Trust** has also been added as a proposed Defendant as well (D187, Schedule of Defendants, p.50). Particularly, when CCTV cameras appear to be misused for sexual harassment and non-consensual filming for malicious purposes, harassment by certain staff members, the alleged leaking of my confidential information/medical records and may have knowingly provided a dishonest advice/assessment and a false report. Because I suffer a persistent sharp chest pain, which can be life-threatening, and the doctor just said it's because of stress.

Another nurse or doctor had already performed the ECG on me earlier. So, I didn't understand why this nurse had to do it again. Probably, she was instructed by the Primary State-Actor Respondents, so that they could sexually abuse/humiliate me via CCTV in that room and then immediately let me know it, to cause me extreme humiliation and distress. They have used this tactic many times before, to let me know it's intentional.

Another example is when I had a dental treatment at a Dental Studio in Slough, also a Defendant (D167, Schedule of Defendants, p.42), about 3-4 months or more ago, in which immediately after the treatment was over and I stood up, through the opening window, I observed a woman wearing a **bright blue** top standing at the gas station opposite the clinic filling the patrol in her car. Because **blue** colour has also been used consistently in the harassment campaign against me as one of the key **colour signifiers**, to let me know it's intentional to convey surveillance.

On 19 June 2026, at approximately 14:20 pm, immediately upon adding the information about the Dental Studio in Slough in the previous paragraph, I observed Person B exiting the house and slam the main door shut.

Furthermore, every treatment I have received from the Dental Studio in Slough also appears to be recorded without my knowledge or consent by the Primary State-Actor Respondents. They then shared it with third parties as usual to permit them to create advertisements making lots of references to my dental treatments, which are too targeted to be accidental. This strongly suggests once again that all my dental treatments at this dental practice, and possibly at other dental practices as well, have been unlawfully recorded without my knowledge or consent - either via hidden cameras or CCTV in that room - by the Primary State-Actor Respondents, who seem to use their power and influence to get businesses and even public sectors to let them misuse the CCTV or install the hidden cameras to monitor and record me without my consent or knowledge. They might not know that the non-consensually recordings will be used for malicious purposes.

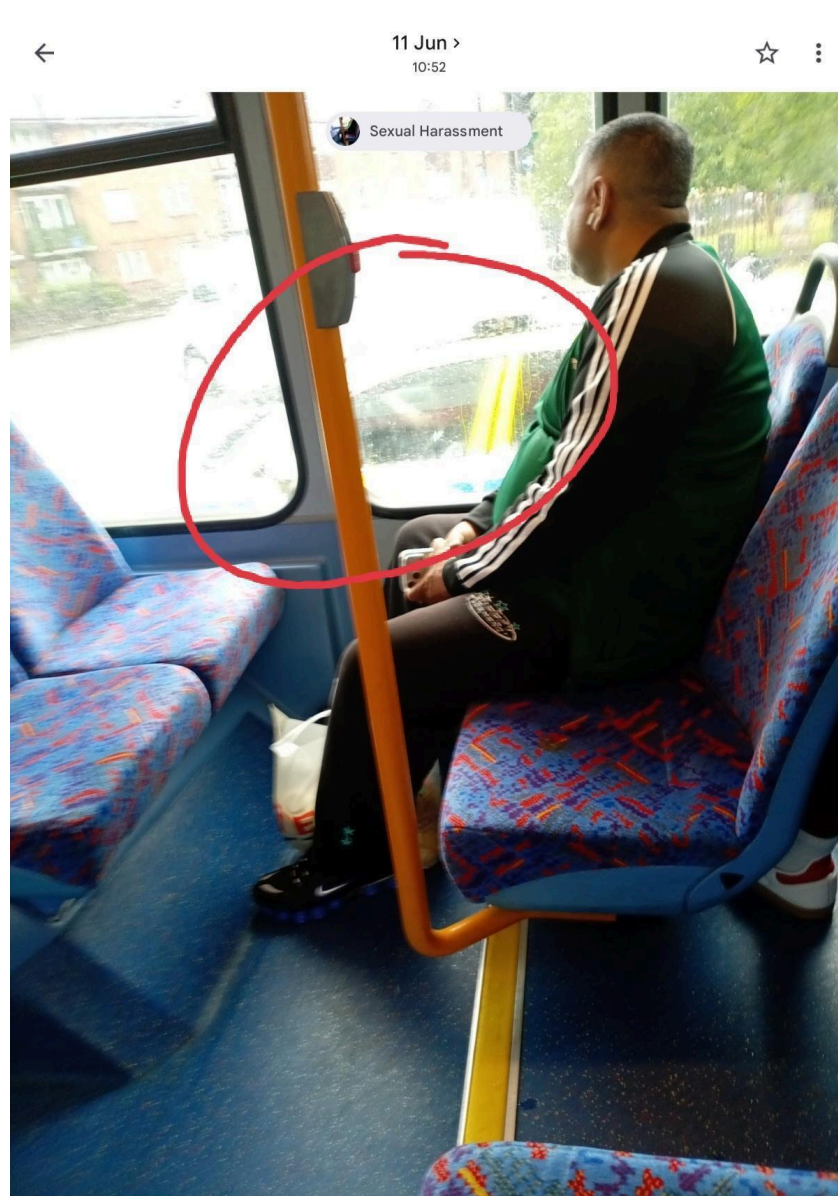

At approximately 15:32 pm, while waiting in the waiting room at the hospital for the result of my assessment, I began to eat a banana. When I was halfway through it, the receptionist/nurse suddenly received a phone call. I knew right away it's to convey surveillance as always that even in the hospitals and everywhere else, they are also actively monitoring me via CCTV to let me know they are surveilling me everywhere I go, not just via hidden cameras in my own home but everywhere. This precise method of giving me a surveillance or voyeurism hint at the exact moment I am halfway through my meal/snack has also been used consistently when I am at home, to let me know they are severely violating my privacy around the clock via hidden cameras.

On 12 June 2026, at approximately 9:15 am, immediately after finishing typing "I began to eat a banana. When I was halfway through it, the receptionist suddenly received a phone call," I observed Eddie, an elderly male housemate residing upstairs in room 11, exiting the property wearing a **navy blue Adidas** jacket as usual. Because I also edited this document on this day. The **navy blue** colour and **Adidas** brand have also been used consistently in the harassment, which I have also mentioned in my main injunction application submitted on 9 June 2026.

Again, on 12 June 2026, at approximately 9:22 am, immediately upon typing the previous paragraph, I heard another individual exit the property and slam the main door shut.

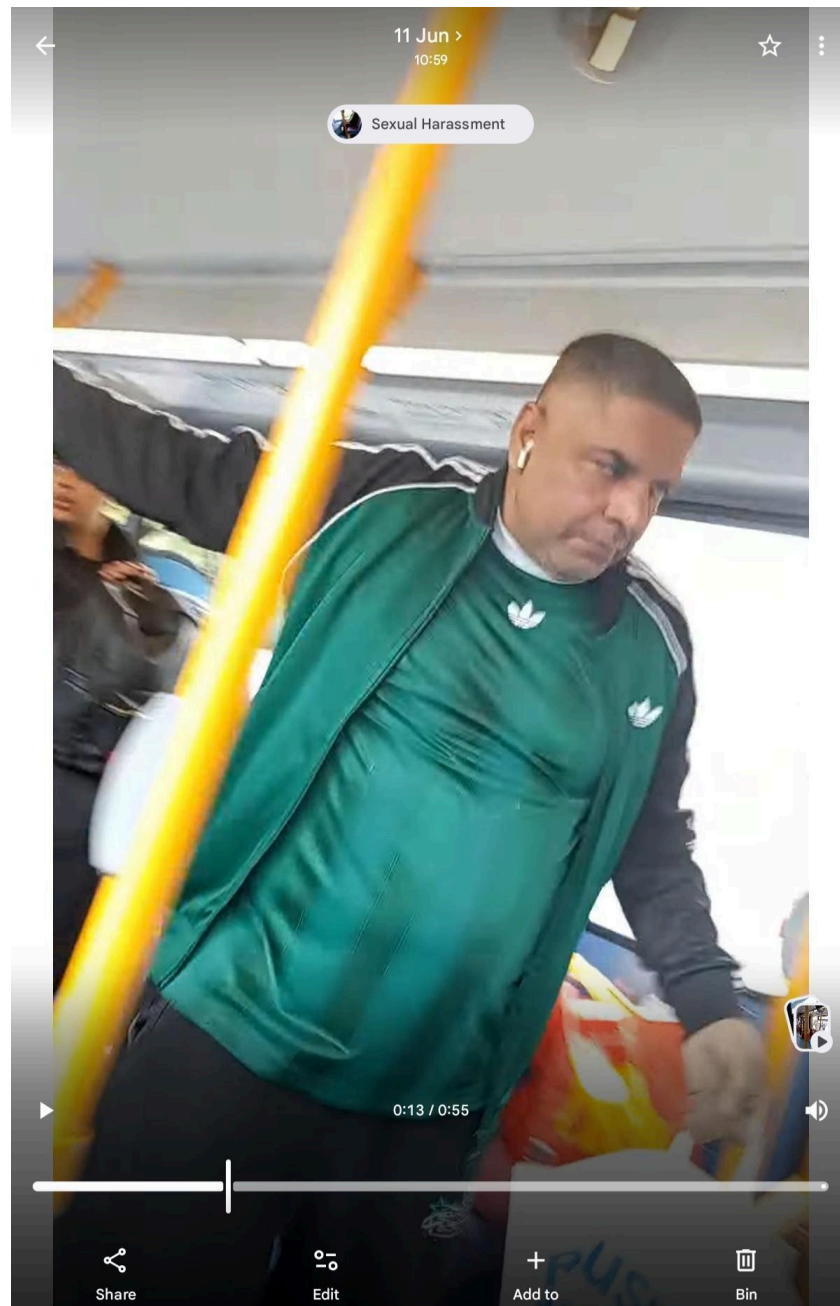

On 17 June 2026, at approximately 19:19 pm, immediately after finishing adding information to this section, I heard some motorcycles accelerate aggressively past my window. The riders seemed to deliberately increase the acceleration abruptly while riding past my window as if to cause a sudden spike in my stress and anxiety, which it did. This is not an isolated incident either. Motorcycles and heavy vehicles appear to have been used as tools for noise harassment lately to increase my stress and anxiety level, which it did. Particularly, whenever I add crucial information or evidence into my injunction application bundle before submitting it on 9 June 2026. The noise harassment by motorcycles and vehicles continues to this day and even intensifies, as I drafted my letters to the police's legal team. Sometimes I do take pictures and videos as evidence. But since it happens too often, I can't keep doing it every time.

Again, on 18 June 2026, at approximately 16:52 pm, immediately upon typing “to the police’s legal team” in the previous paragraph, I heard someone return to the property and slam the main door shut. It’s like this almost every time I mention the Police Respondent (the 2nd Respondent) or other Key Respondents, such as the UK PM Keir Starmer Respondent, the retaliation is swift. This strongly suggests once again that they are still unlawfully monitoring all my legal strategies via hacking or other unlawful means and immediately intimidate me whenever I mention their names or expose their misconduct.

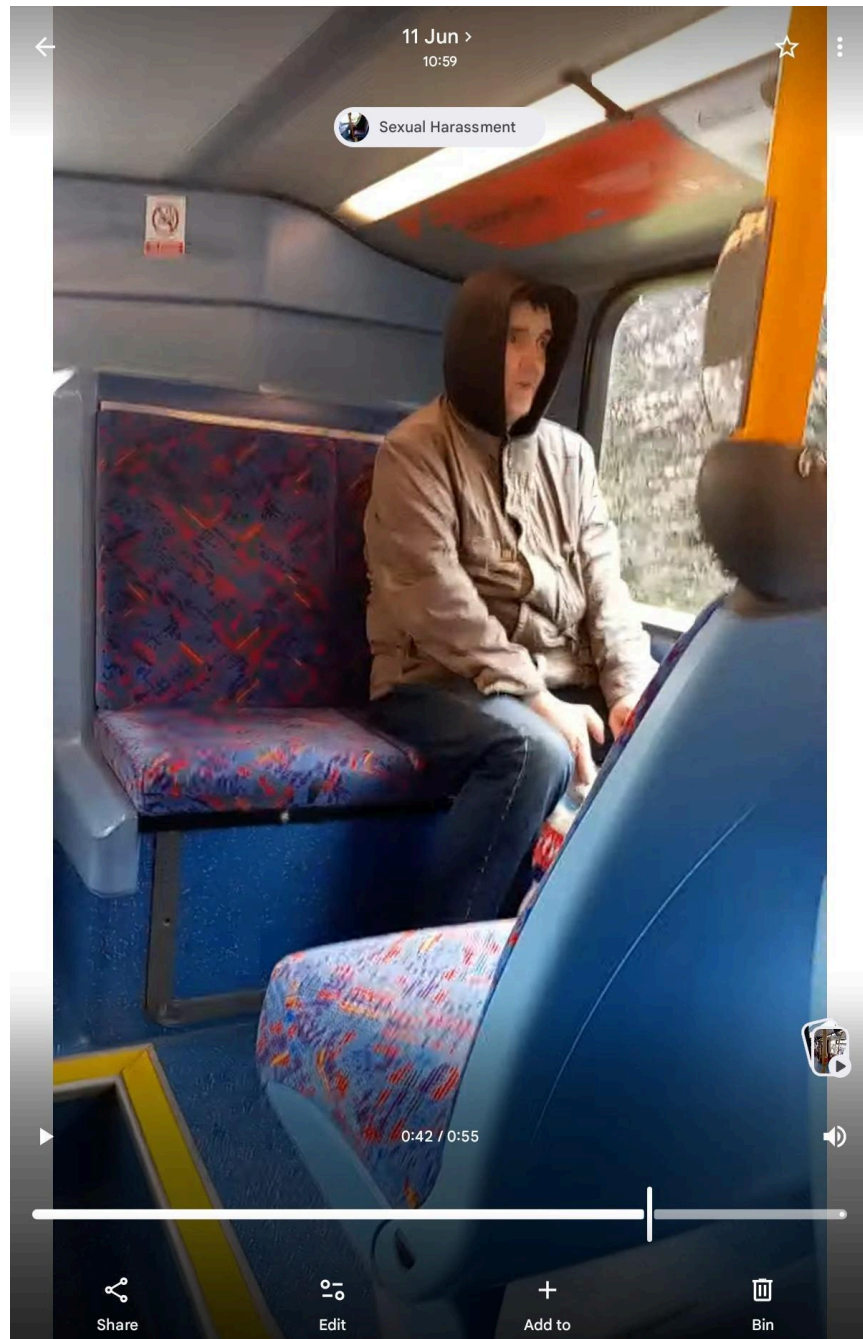

Caption: Also, at around 10:52 am, while travelling by bus number U3 to Hillingdon Hospital Emergency Department located on Pield Heath Road, Uxbridge, Middlesex, UB8 3NN, for my

persistent chest pain and palpitations, I observed a police car driving past the bus I was on, as seen in a red circle in the image above. The man sitting by the window also wore a **green Adidas** top and jacket. **Green** colour, among **red and orange**, for instance, is also one of the key **colour signifiers** frequently used in the **colour harassment** campaign against me. The same with the **Adidas & Nike** brands, as previously described in my injunction application bundle filed on 9 June 2026. He also wore a pair of black **Nike** shoes, as seen in the image above.

Caption: This is a clearer picture of him. He also wore wireless earbuds, which many of the harassers, believed to be acting on behalf of the Primary State-Actor Respondents, also wear.

Caption: At approximately 10:59 am, within minutes of me seeing a police vehicle driving past the bus, an elderly man got on the bus and came to sit right next to me, as seen in the photo

above. This video was taken after I stood up. Because I knew right away it was a sexual harassment as usual.

Because this method has also been used consistently to sexually harass me in public to make me feel uncomfortable as retaliation. This type of sexual harassment often occurs immediately after or soon after I have raised concerns about my daughter that the Primary State-Actor Respondents, both known and unknown, may have also subjected my daughter to the exact same sexual abuse and exploitation via hidden cameras, including via a honey trap, as I also said in my injunction application bundle filed on 9 June 2026. Because yesterday, 10 June 2026, I had also written about this concern regarding my daughter in my upcoming memoir and also posted a video on YouTube regarding a helicopter harassment and intimidation, which occurred the very next day after raising concerns about my daughter. This might have caused them to retaliate immediately the day after.

It also seems to occur almost every time I talk about the UK PM Keir Starmer and his alleged involvement in this, the sexual harassment using an elderly man to sexually harass me in public to make me feel uncomfortable will be immediately employed.

On 20 June 2026, at approximately 13:56 pm, immediately after finishing typing the previous paragraph regarding Keir Starmer and sexual harassment, I heard someone exit the property and slam the main door shut. This suggests once again that all my devices still continue to be unlawfully monitored at all times.

Again, within minutes of me finishing typing the previous paragraph, at approximately 2 pm, I observed the newly moved-in male housemate, possibly residing in the room right above my room, wearing a **sky blue** top, exiting the property and slamming the main door shut.

Caption: On 17 June 2026, at approximately 19:32 pm, immediately after talking about the police driving past the bus I was on and the sexual harassment incident on the bus right after seeing the police car, I observed the aircraft “**drawing a line**” over my window again, as seen in the image above.

Because it's not just this sexual harassment that they had subjected me to today, both on the bus and at the hospital, as I said earlier, but an escalation in all kinds of harassment techniques as well. They even appeared to fill the hospital with their harassers, who wore clothes in **key colour signifiers**, such as **navy blue and army green** colours, to let me know it's intentional harassment, and that I cannot escape their harassment no matter where I go because it's pervasive.

It's like this almost every single time I raise concerns about my daughter, or talk about Keir Starmer that he may be personally involved in this as well, or that he may even be directly behind the order of the illegal installation of hidden cameras both in my and my daughter's accommodations, and everywhere we stay at such as at hostels as well, which I have also mentioned it in my injunction application, to sexually abuse & exploit both of us wherever we are. He may also be directly behind the planting of an alleged honey trap into my daughter's life to manipulate & control her, suppress the truth and gather information to pass it onto him and his Co-respondents for exploitation. Because I have also observed lots of advertisements, social media posts, and even AI-generated content by Grok xAI owned by Elon Musk, for instance, that seem to make lots of references to her as well, strongly suggesting that her private information has also been severely misused. Hence, the Primary State-Actor Respondents have apparently planted a honey trap from Spain into her life to always extract information from her to pass onto his bosses, the Primary State-Actor Respondents in the UK, for malicious purposes. That's why they appear to obstruct my every attempt to warn her and her father about it.

Caption: On 17 June 2026, at approximately 19:53 pm, immediately after talking about Keir Starmer and his alleged involvement in this, as described in the previous paragraph, I observed the aircraft “**drawing a line**” again, as seen in the photo above. This further suggests once again that they are illegally monitoring all my devices, online activities and communications at all times to gain insight into my legal strategies, to prevent me from seeking help and to warn my daughter, and to use the stolen information obtained from hacking or other unlawful means, to plan their harassment and intimidation. Simultaneously, I also heard a motorcycle accelerate aggressively past my window. I had recorded it on video, which can be presented to the court later if requested.

Caption: Again, on 18 June 2026, at approximately 5:43 am, immediately after turning around in bed from left to right and resting my left hand on my right arm, I heard someone slam a car door shut. It appeared to be from this car, as seen in the images above. This is how they also use a car-door-slammng-shut method to convey surveillance as well. Because this happens repeatedly and daily, to condition me to the use of this technique. I have also described this extensively in my injunction application bundle with evidence filed on 9 June 2026.

Caption: On 18 June 2026, at 7:28 am, immediately upon putting my phone away to try to get some sleep, I heard someone exit the property and slam the main door shut. It was Eddie again, as seen in the image above. He also wore a **bright burgundy** top today, which is also one of the **key colour signifiers**, among **navy blue and pink**, for instance, frequently used in the harassment campaign against me. He lives in room 11 upstairs, by the way.

Immediately after adding information about Eddie, I heard someone approach the main door and violently slam it shut without going out. When I opened my door to investigate, the individual quickly disappeared as usual. Consequently, the intimidation escalated exponentially after I had filed my injunction application on 9 June 2026, and after I had emailed the police's legal team my Settlement Offer Letter, Proposed Undertakings and other related documents, as described in Exhibit BW/3.

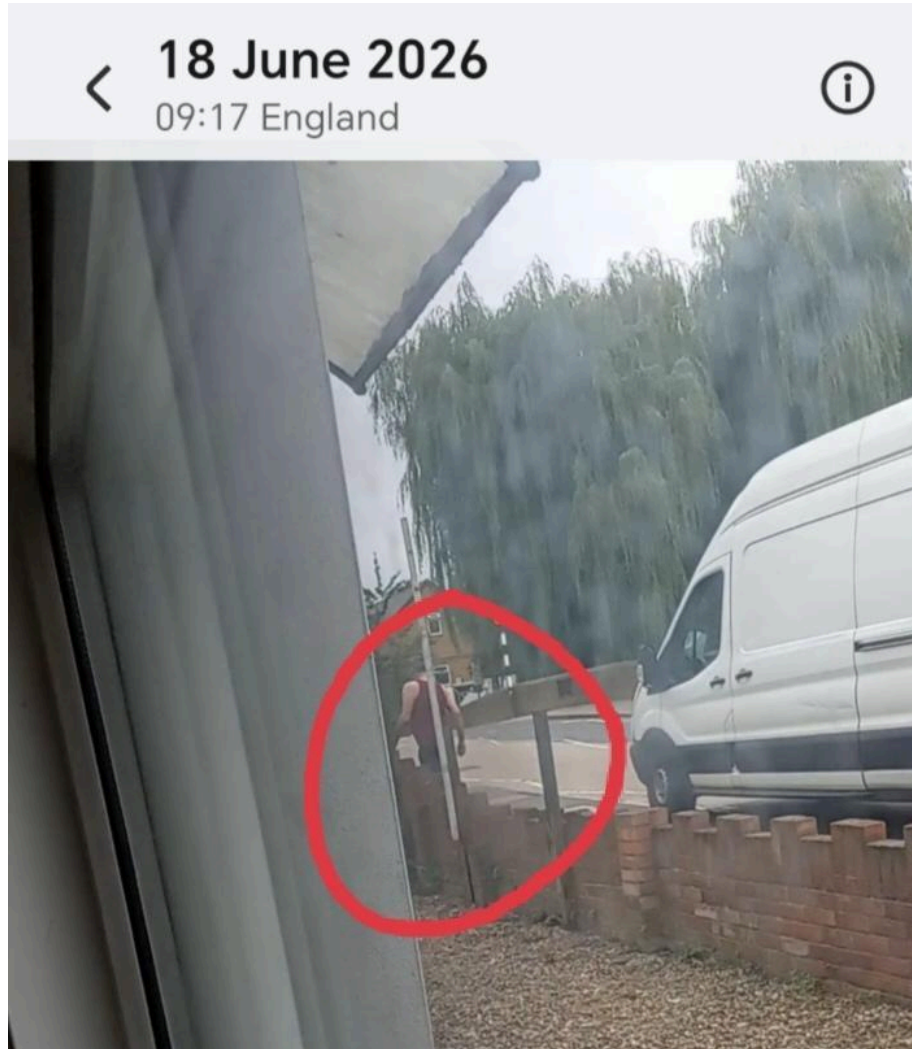

They appear to do this almost every time I try to get some rest as a form of sleep deprivation to exhaust me, so that I cannot prepare my case effectively.

It also seems to intensify as I prepare this Exhibit, Settlement Offer, propose Undertakings and other related documents to also send them to other defendants / their lawyers and the Government Legal Department concerning Keir Starmer.

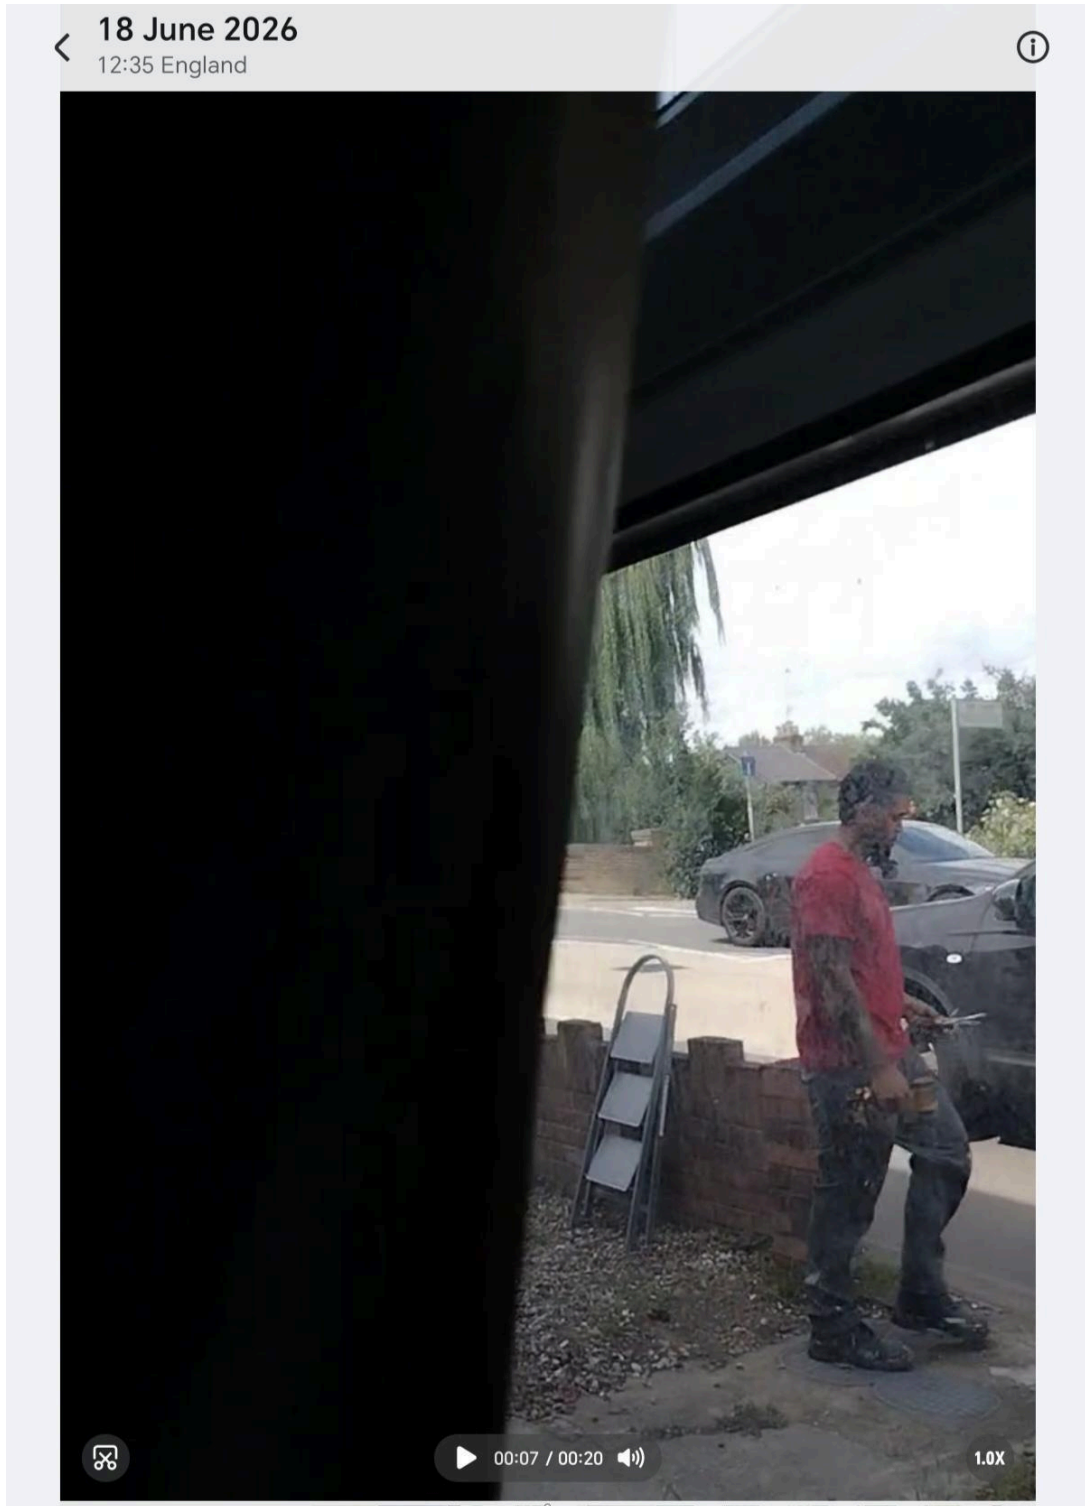

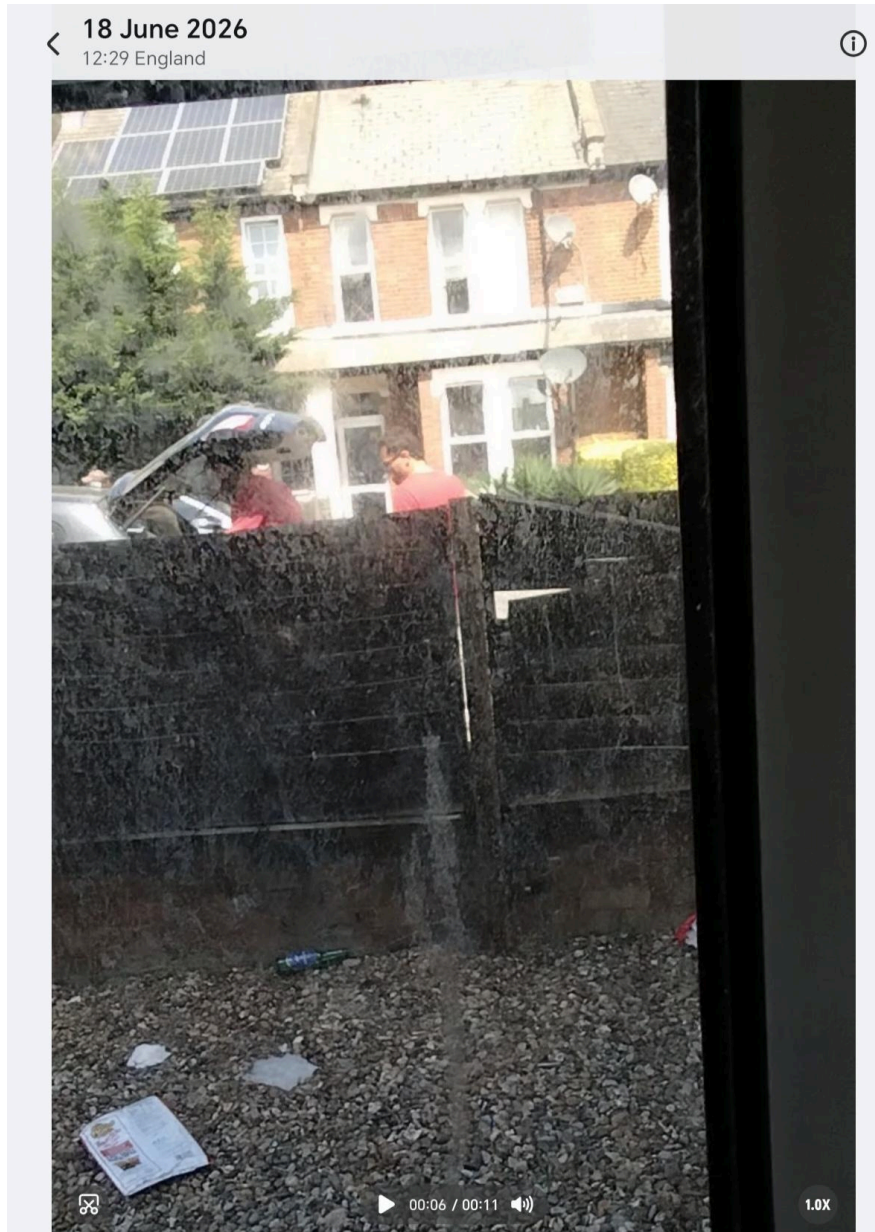

Caption: At 9:08 am, after talking about “sleep deprivation,” I put my phone away to try to get some sleep once again. Immediately after I did that, I heard someone exit the property and slam the main door shut. It turned out to be another male housemate, as seen in the image in a red circle above. He also does this often. The time symbolically ended in the number 8 again (Article 8 ECHR violation).

Immediately after I typed the previous paragraph and put my phone away to try to get some sleep one more time, I heard someone slam the main door shut again. This is how the Primary State-Actor Respondents appear to use illegal surveillance - both via hidden cameras and cyberstalking - to harass, intimidate and torture me.

Caption: At 9:17 am, immediately after I finished typing the previous paragraph, I heard someone exit the property and loudly slam the main door shut. It's Eddie again, as seen in the image above. It's like the more I talk about "sleep deprivation," the more they increase this precise tactic.

Caption: On 18 June 2026, from 12:35 pm onwards, I observed these two men wearing **red** t-shirts, as seen in the photos above, and **red** colour has also been used consistently in the harassment, exiting and returning to the property, pretending to do some work here. They would violently slam the main door shut while going in and out. It's like this almost every time I receive a communication from the police's legal team, an escalation in harassment and intimidation will shortly follow.

Interestingly, they parked their car in front of my window in a way that I could not see their number plate, as if they had been pre-warned. Also, because when I saw them getting in their car ready to drive away, I stood by the window with my phone ready to take pictures of their licence plate as evidence. They then just sat in their car for a very long time and didn't drive

away. But at the exact moment I gave up and sat back down in my bed, they immediately drove away. Once again, this looked therefore like the primary state-actor respondents were constantly observing me both via the hidden cameras and via cyberstalking to monitor my every move. Then, as soon as they saw me stop waiting by the window to take pictures of the number plate, they immediately signaled to the two guys to drive away. Because this is not an isolated incident either. This tactic has been used consistently to avoid evidence gathering.

The repeated violent door-slamming all day today had now worsened my chest pain and chest palpitations. I now felt the constant left-side chest pain once again.

At approximately 22:40 pm, immediately after typing the previous paragraph, I heard someone begin to slam something shut nearby, maybe in the kitchen as usual, to signal to me that everything I type is being read in real-time via hacking or similar methods. This is how the Primary State-Actor Respondents appear to cyberstalk me at all times via their agents and then use third parties, in this case my housemates, to act as messengers to convey their victory, control and sadism.

This is shocking, since they're cyberstalking me 24/7, they have already seen that I have added the Medical Note from the doctor as Exhibit BW/1 which confirmed my stress. But they continue to make it worse by increasing the door-slamming and each door-slamming is even more violent than before. This looks once again like an attempted murder.

At approximately 22:52 pm, immediately upon finishing typing the previous paragraph, I heard a car screech with a sharp noise right outside my window. The sharp noise instantly pierced through my heart and body. This looks once again like their repeated attempts to injure me or even to cause me a sudden death using various, harmful sounds - mostly from vehicles and motorcycles. Sometimes even from low-flying planes. Once again, this is an abuse of power when they go to great lengths to harass and terrorise me.

At approximately 22:59 pm, immediately after I finished typing about the violent door-slamming, I heard someone exit the property and slam the main door shut.

Necessity of Legal Counsel

I have also mentioned in my injunction application bundle submitted on 9 June 2026 regarding a **Norwich Pharmacal Order**. But I will go through it again that an effective pursuit of a Norwich Pharmacal Order, and indeed any legal remedy in this complex and dangerous situation, is entirely contingent upon securing impartial, competent legal representation. A lawyer is essential not only to navigate the legal complexities but also to provide a buffer against the Respondents' intimidation and manipulation tactics, and to ensure **my safety** during the investigative process.

The Primary State-Actor Respondents, both known and unknown, are actively utilising a network of third-party proxy agents and anonymous harassers to target me, both online and in physical spaces such as my housemates and neighbours.

I have made it clear to the Respondents that I intend to apply to this Court for a **Norwich Pharmacal Order (NPO)** to compel the identifying information of these third-party proxies, including their source of instructions, funding, and the digital pathways utilised to coordinate this harassment. Particularly, I reasonably believe that my housemates and neighbours, for instance, hold vital information about the true wrongdoers behind this operation.

In a standard civil dispute, the threat of an NPO and the resulting judicial exposure causes an opponent to cease illicit operations. In this case, however, the Respondents have demonstrated a complete contempt for the Court's authority. They have actively accelerated and continued the proxy harassment without pause. They even defiantly continue to use the exact same housemates, who would be subjected to the **Norwich Pharmacal Order** to compel them to disclose the identities of the real wrongdoers, to harass and intimidate me daily regardless.

This continued **defiance** proves that the Respondents believe they act with absolute impunity, shielded by their status as public officials and their control over the court registry. They are entirely unconcerned by the prospect of standard disclosure applications, confident that they can use proxy agents to shield themselves from direct accountability.

Accordingly, I believe that a standard Norwich Pharmacal Order will not suffice to protect the integrity of these proceedings or my personal safety. The behaviour of the Respondents requires this Court to bypass intermediate disclosure steps and grant an immediate **Injunction Restraining Harassment** against the Respondents and any agents acting on their behalf, coupled with a mandatory order forcing the immediate preservation of all communication logs between the Primary State-Actor Respondents and these third parties.

Caption: Again, on 18 June 2026, at approximately 17:44 pm, soon after writing about Keir Starmer and the “defiance” regarding the NPO, I heard someone exit the property and aggressively slam the main door shut. It turned out to be a male housemate, as seen in the image above, residing in room 2 with an elderly man, I believe. They're probably father and son.

Caption: On 19 June 2026, at 20:32 pm, while editing this document, immediately upon scrolling past the previous image of a young male housemate believed to be residing in room 2, I observed him exiting the property and slamming the main door shut.

This is how the Primary State-Actor Respondents appear to use various means to let me know they're cyberstalking me at all times. It matches the definition of **Tech Abuse**, in which many victims are women. But their abusers are mostly their own partners. Anyway, the purposes behind this are the same which are to assert coercive control over the victims through technology and to prevent them from seeking help. Exactly like what the Primary State-actor Respondents are doing to me.

Caption: At 21:04 pm, immediately after I finished typing the previous paragraph regarding the young male housemate residing in room 2, I heard someone return to the property and slam the main door shut. I then immediately opened my door to investigate, it was the elderly lady residing in room 3 opposite my room, as seen in the image above. She then turned around and angrily asked me: "What?"

Caption: At 21:20 pm, immediately after I was just about to finish typing the previous paragraph regarding the elderly lady in room 3, I heard someone exit the property and slam the main door shut. When I looked out of the window, I observed her son exiting the property, as seen in the image above, who also wore a **dark army green** top.

Caption: At 21:24 pm, immediately after I was just about to finish typing the previous paragraph regarding the son of the elderly lady in room 3, I heard someone exit the property and slam the main door shut. When I looked out of the window, I observed Person B exiting the property, as seen in a red circle in the image above.

Caption: Again, on 18 June 2026, at 17:53 pm, as I was typing about Keir Starmer and “defiance” on page 22, I observed two male housemates residing in the room above my room, who moved in about 4-5 days ago, I think, also immediately exiting the property and violently slamming the main door shut. One of them wore a **sky blue** top and another wore a **navy blue** top. These two colours are also frequently used in the harassment campaign against me as **key colour signifiers** among other colours such as **red, army green**.

It had been quiet for some time. But as soon as I began to talk about Keir Starmer and his alleged involvement in this, the aggressive door-slamming started all over again.
