

URGENT APPEAL SUBMISSION TO THE UNITED NATIONS SPECIAL RAPPORTEUR ON THE SITUATION OF HUMAN RIGHTS DEFENDERS

DATE: 10 October 2026

1. THE ACUTE AND IMMINENT RISK TO LIFE AND PRIVACY

- **Statement of Danger:** The Source (the individual submitting this appeal, or whoever submitting it on her behalf since her access to legal representation being blocked - probably by the UK PM Keir Starmer, which is unlawful and is against both domestic and international law) faces an imminent, credible, and life-threatening risk of physical violence, extrajudicial retaliation, or death.
- The Source also faces an immediate, life-threatening risk of a severe cardiac event (heart attack) and irreversible, systemic destruction of human dignity, perpetrated by certain and high-ranking UK politicians / state actors / public officials in collusion with private commercial entities.
- **Article 2 & 3 Emergency (Right to Life / Prohibition of Inhuman Treatment):** The Primary State-Actor Defendants are engaged in an aggressive, unremitting campaign of operational harassment and psychological intimidation intended to induce catastrophic physical and medical stress. The Source has suffered acute cardiac symptoms, documented by medical professionals at Hillingdon Hospitals NHS Trust on 11 June 2026, creating an imminent risk of a fatal heart attack if the state's coercive actions continue.
- **Article 8 & 3 Emergency (Right to Privacy / Irreparable Digital Harm):** To punish the Source for attempting to seek legal redress, state actors and their commercial proxies have weaponised, uploaded, and widely disseminated the Source's highly intimate materials unlawfully taken with the hidden cameras - illegally installed in every place she lives for more than a decade and continued to do so till this day despite pending injunction - across commercial online platforms. This non-consensual dissemination is being actively monetised for personal financial profit and for harassment to get her off the internet, to also violate her Article 10 (freedom of expression). Because digital publication is permanent, instantaneous, and impossible to recall, it constitutes an irreversible breach of privacy and degrading treatment that cannot be remedied by retroactive damages.
- **Source of Threat:** The intimidation originates from specific state actors and public officials - such as **the UK PM Keir Starmer, the UK Police, the Danish Police and other unknown UK and Danish public official Defendants** - within the United Kingdom and Denmark who are acting outside the law or abusing their institutional power.
- The Source has been entirely prevented from exhausting domestic remedies because the Primary State-Actor Respondents, as mentioned above, are actively executing a total procedural bar.

- They are utilizing covert digital monitoring, equipment interference, and communication interception to systematically block the Source's access to independent legal counsel, solicitors, and direct-access barristers.
- **Failure of Domestic Remedies:** Because the perpetrators of the intimidation are state actors, standard domestic protection mechanisms (such as local police protection) are inherently compromised, unsafe, and unavailable to the Source.

2. CONTEXT OF THE ONGOING UK COURT PROCEEDINGS

- **Case Reference:** KB-2025-004650
- **The Source Legal Status:** The Source is a key witness providing vital testimony in an ongoing urgent injunction application and pending civil trial against dangerous organizations involved in organized crime / large-scale public corruption.
- **Public Interest Value:** The testimony of the Source is critical to exposing systemic wrongdoing, making the Source a direct target for institutional silencing.

3. CHRONOLOGY OF STATE-SPONSORED INTIMIDATION

- Repeatedly received direct physical and verbal threats from housemates and individuals, including receiving hidden death threats, online harassment and intimidation from across online platforms.
- Experienced unauthorized and intrusive surveillance around the clock for more than a decade, both via hidden cameras and cyberstalking, 24/7 non-consensually filming & voyeurism, distributing/live-streaming of the illegal recordings for profit and for harassment, cybersex trafficking, unexplained police presence, and institutional harassment & intimidation designed to prevent court testimony.
- Recent escalation that prompted this urgent appeal.

4. RELEVANT INTERNATIONAL HUMAN RIGHTS LAW

The intimidation of the Source by state actors constitutes a severe violation of international treaties ratified by the United Kingdom, including:

- **Article 2 of the European Convention on Human Rights (ECHR) / Article 6 of the ICCPR:** The absolute right to life, which the state has a positive obligation to protect.
- **The UN Declaration on Human Rights Defenders (1998):** Specifically Article 12, which requires states to protect individuals who report institutional wrongdoing or participate in legal proceedings against human rights abuses.
- **Arbitrary Denial of the Right to Counsel:** (violates Article 14 of the International Covenant on Civil and Political Rights - ICCPR).
- **Incommunicado Detention / Forced Isolation:** For example, restricting movement, cutting off all communications and severe social ostracism.
- **Active Obstruction of Justice and Retaliation against a Human Rights Whistleblower**

- **Total Absence of Due Process and Violation of the Right to a Fair Trial.**

5. REMEDIES AND URGENT ACTIONS REQUESTED

The Source respectfully requests that the Special Rapporteur issue an **Urgent Appeal communication** to the Government of the United Kingdom, demanding that they:

1. **Urgently provide independent medical professionals to assess the Source's health. Because she's suffering a life-threatening, constant and sharp chest pain due to daily severe harassment and intimidation. If left untreated, it could lead to stroke or death. Because all UK medical professionals appear to be compromised when they don't seem to provide an authentic advice/assessment and even seem to repeatedly provide false reports.**
2. **Given the risk to the Source's safety due to the relentless witness intimidation, immediately provide appropriate measures to ensure the Source's protection, including relocation to safe accommodation pending trial.**
3. Immediately cease all operational harassment, surveillance-driven intimidation, and targeted psychological coercion against the Source.
4. Immediately cease all state-sponsored surveillance, 24/7 non-consensually filming using hidden cameras, which also record audio, live-streaming of the illegal recordings, dissemination of private information and intimate materials, harassment, and intimidation against the Source and her daughter.
5. Immediately halt all covert digital monitoring, interception, and equipment interference targeting the Source's communication devices, and guarantee unmonitored, secure access to independent legal counsel and medical professionals.
6. Take immediate operational and diplomatic steps to locate, delete, and scrub all non-consensually disseminated intimate materials from all domestic and international web servers, and freeze all associated commercial user profiles.
7. Immediately remove the **Spanish honey trap / sexpionage from her daughter's life** and **cease the Covert Human Intelligence Source (CHIS) operation** against all her family members, former partners, and everyone associated with the Source and her daughter.
8. Knowingly engage in conduct intended to isolate the Source, interfere with, obstruct, undermine, or damage the Source's lawful employment, professional activities, business relationships, educational opportunities, housing, or lawful means of livelihood, and shall not use their public status to interfere with the Source's right to normal social and professional interaction.
9. Provide independent, non-compromised physical security measures overseen by a body entirely separate from the accused state actors.
10. Guarantee the physical and legal safety of the Source so she may provide evidence to the UK court without fear of assassination or ruin.
