The Broxus Times

Everscale Listed On ByBit

Thanks to the tremendous efforts of the listing team, the team's partnership with MarsDAO and astonishing community support, Everscale has made it to the world's No. 7 exchange - ByBit - and set the all-time voting record with over 41mn votes. Trading for EVER opened up at 10:00 a.m. UTC on March 03, 2023. "It was cool! The feeling of victory is priceless" - said one member of the ProEver community.

EVERPOINT Preparation Has Started

Everpoint 2023 will take place in the UAE to reflect the updated priorities of the Everscale network and its synergy with the Venom chain.

Unlike last year, this Everpoint promises to be more intimate and business-oriented.

The team is currently working on drafting the main topics of the conference, the guest list and invited speakers, as well as the event's main theme.

Partnership with Ongroo

Everscale has signed an MoU with Korean artist group <u>Ongroo</u>. The group plans on launching an NFT marketplace on Everscale and promoting it in Korean art community. Korean media outlets have already <u>highlighted</u> the announced partnership.

RustCup Payouts Progressing

Following the recently accepted proposal, the payouts team has made great progress in verifying over 2/3 of the addresses of RustCup winners and depools, despite some challenges with support for the SafeMultisig contract by Qamon.

StEver Dashboard And Clusters Are Getting Closer

StEver has become extremely popular in the Everscale community and its figures are speaking for themselves: over **100 mn staked EVERs** and **30 depools** in the system. STEVER token price has reached **1.03 EVER**.

Following multiple requests, the team has designed a stEver dashboard that will summarize information about the token price, TVL, APY, holders, participating depools and relevant transactions.

The site will also add a staking page to facilitate stake management for those who prefer doing it on the web instead of in the wallet.

Besides this, the development team is currently working on the implementation of depool clusters that will let user set custom rules and quotas for groups of depools (that typically may be managed by independent validators).

Dev Digest

- Octus Bridge and stEver have undergone audits without critical bugs found

- AMA sessions with ByBit in Telegram and on Twitter Spaces
- Updated Broxus website design

AMA sessions with ByBit gain lots of attention

The recent pre-vote AMA sessions held by ByBit and Everscale on Telegram and Twitter Spaces, drew the attention of over 18,500 people. The impact of the AMAs was felt when voting time came around.

Anonymous Broxie Sold For 300,000 EVERs

One of the rarest items in the <u>Broxie</u> collection has been sold on the <u>TokStock</u> marketplace for 300,000 EVERs, which exceeds the current collection floor price by 60 times.

Recently, the Broxie team has started to release its first utilities and partnerships (including reduced fees on TokStock), which has led to an increased interest in the collection items. Next week, <u>Everplay</u> will host a partnered Brawls Stars tournament.

Anonymous Broxie - one of the rarest NFTs traits in the collection

Collaboration with MarsDAO

Everscale is planning a massive collaboration with MarsDAO community, which was instrumental in supporting EVER in the recent Bybit vote. The partnership plan includes education, AMA campaigns, staking campaign and many more.
