

## NFT MAKING IMPACT WHITEPAPER

With just a few clear rules to support anyone who wants to make an impact, the **NFT Making Impact** is going to be one of the most unique NFT projects of all time.

The NFT Making Impact aims to be an experiment which uses NFT to raise funds to be directed entirely (100% - one hundred percent) to NON-PROFIT associations that fight on the frontline against children's diseases.

**The NONPROFIT association chosen for the destination of these funds will be named by the address that will have more NFTs in their wallet once the collection is closed.**

Before delivering the funds, NFT Making Impact and the associations connected to the NONPROFIT association chosen by the winner will undertake all the necessary measures to guarantee the funds are raised and distributed in total transparency.

The NFT collections will be presented 10 days after the expiry of the collection that has just ended. These will feature a figurative object which will be connected to the Plasticine material, and which evokes the material used in children's favorite hand-play works.

### **Information on the transparency of the project:**

The NFT contract that will present the collection will be registered on the Blockchain and will therefore be visible in all its parts, including all associated economic transactions.

For those who are not familiar with the contract and the blockchain or with the explorer platform that hosts it, we anticipate that there are no royalties for the NFT Making Impact, Developers and Designers. (All the expenses incurred and the work will be proof of participation in what we propose).

Surely there will be fees to be paid to the blockchain and the NFT platform that hosts us, but these will be transparent: the gas fees will be visible in the blockchain and the royalties will be visible in the platform.

Precisely to limit gas fee expenses, we choose POLYGON blockchain with their Token MATIC that guarantee negligible fees.

We will also provide a mintingdapp to purchase the Token directly from the [www.nft-minting-dapp.com](http://www.nft-minting-dapp.com) web page which will be a web page updated for every collection that we present.

### **Important note:**

There are no fees for NFT Making Impact in any future resales made by the owners of the Tokens. We encourage them to keep the purchased Tokens in their wallet, to which other initiatives for aggregation, experimentation and meetings for the future will connect.

Good impact every
