We have here again the typical standard commie corporate pattern.

Several “different” companies acting as one.

Be it the MSM with all there synchronized lies and propaganda be it vaccines,wars,george floyd,rittenhouse,russian collusion,protecting brain dead biden,his son,clintons etc etc.

No matter wether it is Warner, Viacom, Disney/CNN(we can even add all of Hollywood to the list,)

or big tech,where Facebook,Twitter, Google etc follow the exact same patterns

of censorship in terms of specific subjects,coordinated takedown of one and the same person at the same time (Alex Jones)or massively influencing elections.

The secret services of certain countries(5 eyes) who built up a global spying system on an epic scale(prism) are coordinated the same way and the heads of all those 5 eyes countries follow by some strange coincidence the exact same strategies in terms of eroding democracy,lockdowns,vaccination,political correctness, energy &immigration policy and even in terms of contradictions (kissing islams & gay+trans butts at the same time)

Now we have 3 big pharmaccompanies working hand in hand in a very coordinated way and well protected by MSM,big tech and Biden.

As always when we do background checks we will find that at least one of those companies is from NY and one of the founders from Harvard)

And this is not the first time that those companies act coordinated.

They already did this when they created the opiod crisis.

They did this before when they poisoned Americans on purpose with

vaccines and then paid politician tons of money to change the laws so they can no longer be held accountable for harmful vaccines.(for every million the pharmlobby gives to politicians they get 1.7 billion in return on average)

That's why these companies do now whatever they want to.
And another trick they are using here.

Using foreign proxies to do damage to the "own" people is nothing new either.

Stalin was very effective in killing as he was no russian but georgian and to make the gulags more effective the guys who ran the gulag system were usually no russians,too.

Reba says:

November 29, 2021 at 3:38 am

fascinating presentation. my only suggestion is that none of the batches are 'harmless.'

[Reply](#)

arn says:

November 29, 2021 at 1:47 pm

Global Eugenics.

The most interesting question is now.

What are these vaccines really for as the vaccine itself seems to be a trojan horse.

An interesting thing btw that should be mentioned is, that those companies know extremely well how lethal their "vaccines" are.

Especially the last company.

It seems therefore to me that they already did testings for those vaccines on the usual scale (3-5 years) and know exactly how to create vaccines with specific toxicities.

[Reply](#)

Walter Wagner says:

November 29, 2021 at 3:50 am

if true, this will be a huge criminal investigation.

[Reply](#)

LOL@Klimate Katastrophe Kooks says:

November 29, 2021 at 6:25 pm

Temporal grouping and linear step-wise decline in the toxicity of the toxic batches of the Covid19 mRNA 'vaccines' is only half the story as regards the criminality.

Now do a geographic distribution analysis of those toxic batches. When this all comes out and the powers-that-be who ordered this are exposed, the democrat party will be destroyed.

[Reply](#)

Celso says:

December 2, 2021 at 2:47 pm

Pardon, but all these companies work for DOD, none will be prosecuted, the government is privately contracting them to perform genocide on its own citizens. Who's going to sue who?

[Reply](#)

Walter Wagner says:

November 29, 2021 at 4:26 am

This fellow needs to watch his back. This is information of pure criminal intent on the part of various higher-ups at the pharmaceutical giants.

[Reply](#)

LOL@Klimate Katastrophe Kooks says:

November 29, 2021 at 7:25 pm

Not at the pharmaceutical companies, per se. Think higher, and remember the revolving-door hiring relationship between the pharmaceutical industry and government, known about and commented on since the 1970s.

“The FDA protects the big drug companies, and is subsequently rewarded, and using the government’s police power, they attack those who threaten the big drug companies. People think the FDA is protecting them—it isn’t. What the FDA is doing and what people think it’s doing are as different as night and day.”

– Dr. Herbert Ley, former FDA Commissioner, San Francisco Chronicle, 02 January 1970

Moderna co-owns the patent for their mRNA technology with NIH, headed by Dr. Anthony Fauci. In January 2020, their stock stood at \$19/share. It recently passed \$329/share. Guess who owns large tranches of stock options?

And of course, the FDA, headed until Aug 2021 by Janet Woodcock, now headed by Robert Califf, wants to withhold the data they used in determining Pfizer’s Covid19 vaccine ‘safe and effective’... anyone who was stupid enough to buy into this medical tyranny will be long-dead by then. Guess who else owns large tranches of stock options?

[Reply](#)

Linda says:

November 29, 2021 at 5:27 am

Thank you for this, very informative.

The British undertaker John O’Looney estimated by his observation, the same ratio – 80% harmless – 20% toxic. So that the majority of the people who’ve been jabbed will blame and attack the unjabbed, saying “I took it and I’m fine”.

I wonder now, as more people are waking up, if they will go all out to finish the job and increase the toxic batches?

[Reply](#)

Walter Wagner says:

November 29, 2021 at 5:34 am

This is the report he prepared 2 weeks ago, before he discovered the patterns of deployment:

<https://www.bitchute.com/video/6xIYPZBkydsu/>

[Reply](#)

Lionel Little says:

November 29, 2021 at 5:57 am

The thick blue line of no adverse affects, is most likely the line showing those whose adverse reaction will develop over the next years.

[Reply](#)

Alexander+MCCLINTOCK says:

November 29, 2021 at 6:49 am

This looks like very damning information... but...

Has anyone got information on the extent to which the batch sizes vary?

If the 'toxic batches' were merely the larger batches then there would be more adverse events – just because the batch was very large.

I don't think that a batch-size-artefact is likely, given the weird use of batches from only one vaccine company at a time. However, it needs to be checked ASAP!

I wonder if some enormous specialist manufacturer is making vaccines in bulk for the big name pharma companies; could it be that the batches were made outside the USA, perhaps in China or India or Europe

[Reply](#)

Gordon Vigurs says:

November 29, 2021 at 7:58 am

Big pharma may be protected against litigation regarding adverse vaccine effects. However, they are not protected from charges of negligence in failing to oversee the quality control of their sub-contractors, nor do they have any protection whatsoever if the harm caused was inflicted deliberately, as these data indicate. Once they have been taken to the cleaners, their control over the MSM and bent politicians will evaporate.

[Reply](#)

Walter Wagner says:

November 29, 2021 at 4:16 pm

Correct.

The immunity for civil liability for the vaccine is for the vaccine only. This shows that some ((0.5%) if the batches were deliberately adulterated. The immunity only applies to the non-adulterated batches.

We'll be hearing more about this in the next few days. Lawyers are gonna have a feeding frenzy.

[Reply](#)

Gasher says:

November 29, 2021 at 1:46 pm

Possibly. However I think all these companies have manufacturing in the US, but because of the volumes needed the use of subcontract manufacturing is highly likely. That might lead one to conclude that incompetence is the cause but that would (I hope) have been picked up by the industry who must all be doing the same analysis.

I think it's the regularity of the spikes and the seeming coordination of the spikes (ie irrespective of which company) that is worrying. If indeed it is an incompetent manufacturer then who in their right mind would keep using them? Crazy stuff.

[Reply](#)

arn says:

November 29, 2021 at 5:09 pm

Well, these people are already doing what should not be done.
Using an experimental untested drug on people.
Why should (assuming there is no more sinister story behind it though the symmetry of the patterns indicates coordination) such guys give a crap about using “incompetent” manufacturers and therefore lowering their profits.

All the companies involved in this scheme have already paid billions of dollars in penalty fees as result of their criminal actions and
for poisoning American people they have been rewarded with impunity in return.
(Imagine me shooting and Biden and then getting impunity and free shooting of people as result of the crime-sounds crazy, but this literally happened)

[Reply](#)

Gasher says:

November 30, 2021 at 1:25 pm

I've done some reading and my conclusion is that the dystopian view is the correct one.
This pattern shown by Craig Paardekooper is probably correct. I tried hard to find similar for the UK – I definitely remember seeing MHRA yellow card data with batch number but can't find it easily now.
The University of Almeria discovered graphene in approximately 10% of the vaccine samples from four manufacturers. Dr Noack the top European expert on graphene said that this will not break down in the body and continue to do damage. He said that continuing to inject people knowing that they will be killed is genocide. He was brutally murdered for this (and comparing his prime minister to Hitler)

A: The least worst scenario goes like this...

1. The whole world is infected with a deadly virus (let's not discuss how) and poses an existential threat to humanity.
2. There are some ideas of how to create a vaccine (we won't discuss why this is the only route chosen) but at the rates projected (by Imperial College) we will all be dead in three years.
3. The candidate vaccines can't be produced quickly enough so different ideas are brought forward – experimental mRNA “non-vaccines” and/or use of nano technology to enable more efficient use of the precious life saving vaccines. Various nano technology techniques were used to see which is most effective.
4. There were no large scale clinical trials so the vaccines are adjusted/tuned at the same time as manufacture. Different nanotechnology and different formulations and different doses are continually being experimented with to find the right dose.
5. We discover the right dose and we all survive (except the unlucky few that died during the experiment)

B: The worst case view is that the virus was deliberately

engineered from a flu virus and yet is no more deadly than a normal flu. The vaccine has been designed to gradually exterminate the worlds population. It has to be done gradually so that the wheels of industry keep turning and covers the perpetrators tracks.

Despite the protestations of “fact checkers” that this is all rubbish we know that there is not a free flow of information, people are silenced or killed.

A or B? Both? Either way it’s awful. In my humble opinion it’s an imperfect storm of incompetence, greed and megalomania. Unintended consequences or intended?

A few links to entertain you...

[Reply](#)

arn says:

November 30, 2021 at 6:37 pm

Dr Noak was raided by the police a few days before he died.

So i guess he was given the terminating stuff several days before.

I guess he was very close to the truth and exposing things he shouldn't.

Same thing happened to Dr Kelly before the Iraq war,

Seth Ritch in terms of Clinton e mails, or this guy who was about to announce a dirty truth about Obama next monday, but died from a heart attack.

I wouldnt be surprised if Noak got the nano graphene treatment himself.

Scott says:

November 30, 2021 at 7:10 pm

Nobody knows anything about batch sizes. Batches (in this case) seem to be applied to packaging, as opposed to, say, a certain manufacturing line. Although, that is how it “should” be accounted for, this video talks in terms of a coordinated conspiracy, among all the manufacturers. A manufacturer could run three production lines, concurrently, then put the viles in a single bulk package and call that a lot. How would we know? We wouldn't; we couldn't. So, one would have to assume they wanted to be discovered.

Further, the VAERS database is known to include maybe a tenth of total reportable adverse events. Hardly a representative data source. What if there were “lots” for which there are lots of adverse events, but none reported? Too many factors for me.

A more damning analysis should be done on the Executive Order issued by Donald Trump, in September 2019, followed by testimony from Fauci before Congress in December, 2019, describing “self-replicating” “new” “mRNA” vaccines to be used for “National Security” and public health. Yeah, that would be much more productive.

[Reply](#)

Gasher says:

November 29, 2021 at 1:37 pm

If you haven't read the authors comments under his videos you should – so I'm copying and pasting them here. The author seems to hint that the toxic batches were coordinated across the vaccine suppliers so this could lead one to conclude that:

1. There is a much wider agenda at play here;
2. Someone else is telling the pharma companies what to do;
3. The human population is being experimented upon;
4. Etc
5. Etc

Anyone got a positive spin on this?

+++

Latest video (shown here)

VAERS database provided the batches in time sequence, and has records of all the adverse reactions associated with each batch.

So it was a simple task to create a graph showing how toxicity of the batches varied with time over the entire year of 2021.

From the graph we can see when toxic batches were deployed, and how toxic they were.

We can also see WHO deployed them, and how the pharma companies acted in relay, so as to not intrude on each other's time slot

Finally, we can discern the purpose and reason for these toxic deployments – dosage testing etc

+++

First video (on BNT)

The purpose of this study was to determine if there is any significant variation in batch toxicity – by counting the number of adverse reaction reports associated with each batch number.

The number of adverse reactions in each State of the USA caused by each individual batch was also counted.

The results were interesting.

70% of the batches were harmless – producing only one adverse reaction report each.

80% of the batches produced only 1 or 2 adverse reaction reports. So the vast majority of the batches were harmless.

However, a very distinct and significant anomaly appeared.

1 in 200 (0.5%) of the batches was found to be between 1000 and 5000 times more toxic than the average batch, and accounted for 70% of all of the adverse reactions, and 70% of all of the deaths

1 in 20 (5%) of the batches accounted for 90% of the adverse reactions and deaths.

These toxic batches consistently produced high levels of adverse reactions, disability and death across every State in the USA, in sharp contrast to the harmless batches. As a consequence the toxic batches are easily visible as a string of numbers across the screen in the video above.

The consistency with which these batches produce adverse reactions indicates that the adverse reactions are caused by the batches rather than by the health status of the recipients.

The probable reason for these more toxic batches is either

1. The batches contain added ingredients that are highly toxic
2. The batches are of a higher concentration of the same ingredients

The later suggests that Pharma may be investigating the LD50 (Lethal Dose) in order to establish the therapeutic range. Needless to say, such experimentation carried out on human beings has already resulted in deaths and disabilities – as shown in this report.

The question arises –

If there is such high variation in the toxicity of the batches, should we be mandating this medical intervention?

Should we be coercing people under threat of losing their job or being confined at home , into taking something where death or disability is a possible adverse reaction?

[Reply](#)

GWS says:

November 29, 2021 at 6:23 pm

No. But peer pressure and guilt can override common sense. The “woke” are such for a reason.

[Reply](#)

Andree Hammerschmidt says:

November 29, 2021 at 2:35 pm

Millions of people have fallen for the lies and deliberate misinformation of corrupt politicians.

These people bitterly regret being vaccinated through deception or pragmatism.

The anger and disappointment will ultimately doom the politicians, I am convinced of that!

Vaccinated or unvaccinated, shake hands, because the enemy is not your fellow man, because the real criminals are sitting in Parliament, Congress and higher up !

[Reply](#)

Mary I. says:

November 29, 2021 at 6:17 pm

Tony,

Thank you for sharing this. I hope someone with the mental wherewithal can reproduce this information from the VARS database.

[Reply](#)

Steve Close says:

November 29, 2021 at 7:54 pm

This makes no sense. All three vaccines were offered about the same time. The x-axis was not compartmentalized, all three were released simultaneously along the x-axis over time. Have to say this is the biggest load of b***** I've seen. I'm surprised Tony Heller would post it. Mind you, I am strenuously against the vaccine and there is enough evidence that they are useless and worse, harmful, but I see no point in making up things other than a false flag to further discredit so-called anti-vaxxers.

[Reply](#)

Walter Wagner says:

November 30, 2021 at 2:52 am

Watch his first video, which makes no assertions regarding the time release of the batches: <https://www.bitchute.com/video/6xIYPZBkydsu/>

Instead, he simply discusses that 80% of the batches produce 0-2 adverse events; as well as the anomalous batches that stand out like a sore thumb. He then discussed the 1-in-200 batches that produce large numbers of adverse events.

Here is his video explaining how he generated that data analysis from the VAERS data: <https://www.bitchute.com/video/EPOPrWBOzi6d/>

If you can see any deliberate error, let me know. I saw none.

How do you have information on the time release of the batches, anyway?

[Reply](#)

Walter Wagner says:

December 2, 2021 at 4:09 am

Incidentally, I followed his tutorial video and was able to replicate his same data chart using the pivot table to do so.

[Reply](#)

Walter Wagner says:

November 30, 2021 at 3:39 am

Also, I believe you misread his graphs and analysis.

He is not saying that Moderna released batches first, followed by Pfizer.

He's saying they were all releasing batches simultaneously over time that were harmless (99.5% of the total batches).

The other 0.5% ("toxic batches") are what show the temporal relationship, with the Moderna first, followed by the Pfizer. The harmless batches are all on the x-axis, and represent roughly 99.5%. Hard to see, because they are all on top of each other.

He should expand the bottom line (x-axis) so you can see how many batches that are there (10s of thousands).

[Reply](#)

Paul Fassa says:

November 29, 2021 at 11:51 pm

@Andree: Concisely well stated – “and higher up!” This means out of sight from the mainstream news and entertainment media and all legal institutions local and national.

This also means available to the choir but unable to reach the parishioners, most of whom do not want to know that which may disrupt their “faith”.

[Reply](#)

Thaipixie says:

November 30, 2021 at 9:26 am

Everywhere there have been minimal deaths from covid like here in thailand 89 deaths until april 2021, Bali less than 40. The vaccines arrive end of April and today Thailand more than 20,000 deaths and Bali more than 4,000 and unknown order of magnitude of other injuries...

[Reply](#)

Timo, Not That One says:

November 30, 2021 at 4:15 pm

Sad observation.

Clearly the spring/summer outbreak was caused, somehow, by the toxic mRNA jab.

The second wave, last winter, was equally clearly the annual flu.

Only the original outbreak was a virus/bioweapon. That first one only killed the old and infirm.

All of this was orchestrated by our “leaders” and their propaganda machine, the “news media”. Not sure what the reason for it is, but I am sure that it is evil, no matter how you interpret it.

[Reply](#)

Timbo says:

November 30, 2021 at 8:29 pm

It's proolly even more sinister with medium and long term lethality for all but the Placebo shots waiting around the corner.

[Reply](#)

Fran says:

This analysis is from the US showing systematic insertion of toxic batches. I am curious about what is going on in the rest of the world. It seems there were/are toxic batches in most countries administering high numbers of doses. One indicator is that the sporting types dropping dead come from all over.

[Reply](#)

Carl M Seibert says:

. The epitome picture is the depicting of these elitist pigs of the DC Orwellian Animal Farm is when Beijing Jo O'Brien was looking at his watch when the 13 servicemen and women were needlessly murdered by the Taliban under his & Gen. WOKE Milley's Stupid unbelievable plan to arm the Taliban to give the key Bases to the CCP as Biden Views Bodies of Service Members Killed in Kabul Bombing, like "hurry up" I have better things to do. However, his push to inject 5 years old Children is the killing fields of these Deep Staters' elimination and the replacement and demographic change to a more ignorant and compliant group of servants.

Ever wonder why the DNC/CCP replacement illegals 'voters' that are used to a dictator like Beijing O'Brien are not required to be injected? It is because Deep State Politicians like those DC Swamp Animals "prefer unarmed ignorant peasants!"

December 1, 2021 at 2:33 pm

I have received a few private communications from CRAIG PAARDEKOOOPER which I share below:

<https://www.bitchute.com/video/g62gcJrOuOYu/>

“Dear Walter Wagner,

Thank you for your introduction. Your background is indeed very impressive. Your careers embraced the inspiring innovations of the times – in biology and physics

For myself, I studied philosophy of religion then a degree in psychology. Then I worked in marketing. Then I was a software developer, and finally I entered the life sciences where I was very happy to obtain a Certificate in Life Sciences Allied to Medicine. I was pursuing a degree in Pharmaceutical Sciences when lockdowns began, and have had to depart from that course for now.

In the future I shall resume Bioinformatics and the study of anti-ageing mechanisms within the body. However, for now I must simply survive the current tyranny.

What Led Me to Know that Something was Amis?

1. The Govt’s obsession with the vaccine even before one had been made (back in 2020)
2. The complete rejection by the Govt of any safe alternative – Vit D, HCQ, Ivermectin
3. The willingness of the Govt to destroy every bit of their economy through lockdowns
4. The failure of the Govt to slow down vaccine rollout despite obvious deaths and disabilities being caused
5. The psychopathic way that hospitals and doctors were treating people – presumably because of Govt policy
6. The mass censorship of any doctors, nurses or scientists who spoke out
7. The proposed introduction of a vaccine passport – and the no jab no job policy
8. The orchestrated and unified adoption of identical tyrannical policies across every country in the world
9. The Govt removing all liability from Pharma for any adverse reactions
10. Universities complicit in vaccine production actually murdering hundreds of people in order to discredit HCQ
11. The widespread deaths in carehome following the vaccination
12. The censorship of mass media, science journals and social media

What was the Response of People

The response of most people to these events was

- a) to trust the Govt or
- b) not to trust the Govt

I chose not to trust them. I suspected that the vaccine was toxic – so the Govt wanted to hurt people. However, they had to do it a bit at a time because otherwise they would be exposed and thrown out of power. So I realised that they would keep deaths and injuries at the 5% level of significance – just on the threshold of perception.

Testing out the Idea

Even though I thought this was the case, I didn’t test the idea until Stew Peters Show mentioned that 5% of the batches were more toxic. I decided to see for myself, and downloaded the VAERS. I wanted to see if there was any significant

variation in toxicity between batches. I found two things –

1. 0.65% of batches produced 1000 – 5000 adverse reactions per batch – the 0.65% produced high adverse reactions across all states consistently and accounted for 70% of all the deaths and adverse reactions
2. 80% of batches only produced 1-2 adverse reactions per batch. 95% of the batches accounted for only 10% of all deaths and adverse reactions

So there was evidence suggesting that the batches might vary greatly in toxicity. I didn't know the batch sizes, but assumed they were all equal.

The Deployment Patterns

The clustering of toxic batches in time, the clustering of toxic batches into defined ranges of toxicity, the step-wise linear decrease in toxicity – the abrupt appearance and disappearance of toxic batches, as well as the time slotting of all the companies suggest a non-random occurrence of the batches generating high adverse reactions.

Further Investigation

I can investigate further the variation in toxicity of the batches by looking at the % of reports for each batch resulting in death, disability, prolonged hospitalisation. Presumably, if a batch is more toxic, it will generate a higher % of reports that result in death.

Confirmation of Toxic Effects of Batches

Since 90% of deaths and adverse reactions are caused by a mere 10% of the batches – that is ample grounds for suspecting a variation in toxicity. The nature of that toxicity, being blood disorders/clotting and immune dysfunction. I haven't yet examined the differences in specific symptoms between batches, but my guess is that all adverse symptoms will increase in proportion to the number of adverse reactions. In other words, there is no qualitative difference in the toxicity – all batches produce the same symptoms but to varying degrees owing to varying concentrations of the toxic ingredient.

Still it would make an interesting study to examine the distribution of specific symptoms between batches.

Regarding the Deployments of Moderna and Pfizer

My graph is ordered in ascending VAERS ID, so all the batches deployed by Moderna were definitely deployed first, followed by Pfizer afterwards. Pfizer had absolutely no input in the early adverse reaction reports. All of the first half of the reports were linked to Moderna vaccinations and Janssen (two distinct spikes) .

I would like to discuss this point further with you. If media are claiming that Pfizer was first, then something very odd is going on here, and warrants close investigation.

Preparing for the Future

Thank you for your email. The response to the videos has been enormous – in total approaching 100,000 viewers. More detailed analyses must follow. I am glad that this information is slowing down the Pharma agenda, since they have killed so many people – young and old – and they need to be slowed down

I don't know if we can stop this agenda. The players are too determined, organised and powerful. However, we could make it harder for them – and we could prepare our defences for what they are intending.

I have prepped as best I can, and am now involved in setting up mutual aid hubs across the world so that if unvaccinated people are excluded from society, they will still be part of an interconnected unvaccinated community. BY raising awareness of the truth, more people will belong to that community, and my chances of survival will be greater.

Regards

Craig Paardekooper”

I have received another private communication from Craig Paardekooper. He has made a minor corrective. I expect he will release a video about that soon.

Essentially, in his deployment video, he has three separate deployment strategies shown. In fact, the sequence of deployment is based on lot/batch number, going from lowest number to highest number, rather than actual date of issuance. While one can presume that, for example, the sequential numbering of the Pfizer batches are also chronological, they in fact overlap in time with the Moderna batches. The step-like function of the Pfizer batches is still evidenced, though based on sequential numbering of batches, rather than actual date of issuance.

Unlike many in the government agencies unwilling to issue correctives, Craig is upfront about that minor error.

On a related note, it was in today's news that 1200 deaths were associated with the Pfizer deployment in its first 90 days, as per this:

https://twitter.com/MaajidNawaz/status/1466752743276744708?ref_src=twsrc%5Etfw%7Ctwcamp%5Etweetembed%7Ctwterm%5E1466752743276744708%7Ctwgr%5E%7Ctwcon%5E1_s-court-orders-release-of-pfizer-covid-19-jab-data-over-1200-recorded-deaths-in-the-first-90-days%2F%3Futm_source%3Dnewsletter_randyutm_medium%3Dmixedutm_campaign%3Dnewsletter_randy

Hey Walter, I have been trying to get in touch with Craig myself because I just discovered that this analysis which I posted the other day is now BLOCKED on both Brandnewtube and bitchute, which is the first time I've seen that happen on those sites – he obviously hit a major nerve here! I was very pleased to find this site with a still active link to his video, but I won't be at all surprised if this gets blocked as well. Can you tell me how I can contact him please?
