

Walter Wagner says:

December 1, 2021 at 2:33 pm

I have received a few private communications from CRAIG PAARDEKOOPER which I share below:

<https://www.bitchute.com/video/g62gcJrOuOYu/>

<https://web.archive.org/web/20211211095030/https://www.bitchute.com/video/g62gcJrOuOYu/>

“Dear Walter Wagner,

Thank you for your introduction. Your background is indeed very impressive. Your careers embraced the inspiring innovations of the times – in biology and physics

For myself, I studied philosophy of religion then a degree in psychology. Then I worked in marketing. Then I was a software developer, and finally I entered the life sciences where I was very happy to obtain a Certificate in Life Sciences Allied to Medicine. I was pursuing a degree in Pharmaceutical Sciences when lockdowns began, and have had to depart from that course for now.

In the future I shall resume Bioinformatics and the study of anti-ageing mechanisms within the body. However, for now I must simply survive the current tyranny.

What Led Me to Know that Something was Amisss?

1. The Govt’s obsession with the vaccine even before one had been made (back in 2020)
2. The complete rejection by the Govt of any safe alternative – Vit D, HCQ, Ivermectin
3. The willingness of the Govt to destroy every bit of their economy through lockdowns
4. The failure of the Govt to slow down vaccine rollout despite obvious deaths and disabilities being caused

5. The psychopathic way that hospitals and doctors were treating people – presumably because of Govt policy
6. The mass censorship of any doctors, nurses or scientists who spoke out
7. The proposed introduction of a vaccine passport – and the no job no job policy
8. The orchestrated and unified adoption of identical tyrannical policies across every country in the world
9. The Govt removing all liability from Pharma for any adverse reactions
10. Universities complicit in vaccine production actually murdering hundreds of people in order to discredit HCQ
11. The widespread deaths in carehome following the vaccination
12. The censorship of mass media, science journals and social media

What was the Response of People

The response of most people to these events was

- a) to trust the Govt or
- b) not to trust the Govt

I chose not to trust them. I suspected that the vaccine was toxic – so the Govt wanted to hurt people. However, they had to do it a bit at a time because otherwise they would be exposed and thrown out of power. So I realised that they would keep deaths and injuries at the 5% level of significance – just on the threshold of perception.

Testing out the Idea

Even though I thought this was the case, I didn't test the idea until Stew Peters Show mentioned that 5% of the batches were more toxic. I decided to see for myself, and downloaded the VAERS. I wanted to see if there was any significant variation in toxicity between batches. I found two things –

1. 0.65% of batches produced 1000 – 5000 adverse reactions per batch – the 0.65% produced high adverse reactions across all states consistently and accounted for 70% of all the deaths and adverse reactions
2. 80% of batches only produced 1-2 adverse reactions per batch. 95% of the batches accounted for only 10% of all deaths and adverse reactions

So there was evidence suggesting that the batches might vary greatly in toxicity. I didn't know the batch sizes, but assumed they were all equal.

The Deployment Patterns

The clustering of toxic batches in time, the clustering of toxic batches into defined ranges of toxicity, the step-wise linear decrease in toxicity – the abrupt appearance and disappearance of toxic batches, as well as the time slotting of all the companies suggest a non-random occurrence of the batches generating high adverse reactions.

Further Investigation

I can investigate further the variation in toxicity of the batches by looking at the % of reports for each batch resulting in death, disability, prolonged hospitalisation. Presumably, if a batch is more toxic, it will generate a higher % of reports that result in death.

Confirmation of Toxic Effects of Batches

Since 90% of deaths and adverse reactions are caused by a mere 10% of the batches – that is ample grounds for suspecting a variation in toxicity. The nature of that toxicity, being blood disorders/clotting and immune dysfunction. I haven't yet examined the differences in specific symptoms between batches, but my guess is that all adverse symptoms will increase in proportion to the number of adverse reactions. In other words, there is no qualitative difference in the toxicity – all batches produce the same symptoms but to varying degrees owing to varying concentrations of the toxic ingredient.

Still it would make an interesting study to examine the distribution of specific symptoms between batches.

Regarding the Deployments of Moderna and Pfizer

My graph is ordered in ascending VAERS ID, so all the batches deployed by Moderna were definitely deployed first, followed by Pfizer afterwards. Pfizer had absolutely no input in the early adverse reaction reports. All of the first half of the reports were linked to Moderna vaccinations and Janssen (two distinct spikes) .

I would like to discuss this point further with you. If media are claiming that Pfizer was first, then something very odd is going on here, and warrants close investigation.

Preparing for the Future

Thank you for your email. The response to the videos has been enormous – in total approaching 100,000 viewers. More detailed analyses must follow. I am glad that this information is slowing down the Pharma agenda, since they have killed so many people – young and old – and they need to be slowed down

I don't know if we can stop this agenda. The players are too determined, organised and powerful. However, we could make it harder for them – and we could prepare our defences for what they are intending.

I have prepped as best I can, and am now involved in setting up mutual aid hubs across the world so that if unvaccinated people are excluded from society, they will still be part of an interconnected unvaccinated community. BY raising awareness of the truth, more people will belong to that community, and my chances of survival will be greater.

Regards

Craig Paardekooper”
