Development roadmap

ALCHEMIX

Audit & Testnet
↓

Deploy v2

The Alchemix core team is delighted to share plans of our current vision going forward

Please note that progress is governed by the DAO

Please join the community discussion in our discord
discord.gg/alchemix

Alchemist v2
CDP system, multiple strategies, new collateral types, delegated credit

New strategies
Vault adapters to enable new strategies from a variety of yield aggregators

↓

AlchemixDAO

Insurance module
ALCX provide protection to the protocol in the event of a black swan

Protocol rewards module
Protocol rewards to ALCX stakers

Gamified DAO
DAO designed to maximise participation through gamification

Governance module
Providing decentralised voting and execution for ALCX holders

DAO end game
On-chain DAO that executes goveranace actions on-chain

Decentralise

Safe-snap governance
Snapshot governance that is directly actionable on-chain

Community contributions
Opening development opportunities to the community

Grant program
Funded projects that expand the eco-system

v2 Modules

Boost users
Users lock-up collateral to donate their yield to the protocol for ALCX in return

Collateralised credit applications
Users provide Alchemix credit against other users on-chain assets

Collateralised credit auctions
Users provide Alchemix credit against other users on-chain assets using an auction format

Streampay
Streaming credit using delegated credit

Recipe book
Preset vault strategy combinations for convenience

Multichain (EVM compatible)

Arbitrum

Polygon

Fantom

Binance

Solana
