

How to Mint Your Token on Solana Mint Forge

Solana Mint Forge empowers users to mint tokens seamlessly. Follow this step-by-step guide to create your token with ease.

Step 1: Connect Your Wallet

Begin by connecting your wallet to access the app's features. The 'Connect Wallet' buttons are available in the top right and bottom left corners of the platform.

Step 2: Upload Your File to IPFS

Once connected, upload any file to IPFS for free. IPFS is a decentralized storage solution useful for various applications.

Welcome to Solana Mint Forge—where creativity meets blockchain! We've made it easier than ever to bring your ideas to life on the Solana mainnet. Whether you're a seasoned developer or a newcomer to the crypto space, our platform empowers you to mint your very own MEME tokens in just a few clicks.

But we don't just stop at minting. Holders of our native token, SMF, can mint even more potential. By holding SMF, you gain access to exclusive features, fees, encouraging you to become a part of our growing community. If you don't hold SMF, you can still mint, but you'll pay a small fee.

Powered by Next.js, Pinata, and Anchor, our platform combines cutting-edge technology with user-friendly design to offer a seamless minting experience. Join the Solana Mint Forge revolution today and turn your MEME dreams into reality!

First let's upload your token image to ipfs

[Load recent](#) [Upload](#)

Ready to get started? Click upload above to start the minting process. Create your first MEME token and make your mark on the Solana blockchain.

Step 3: SMF Holder Verification & Mint Fee

After file upload, the platform checks your SMF token status. If you hold SMF tokens, you bypass the mint fee page. Non-holders must pay a 0.25 SOL fee to proceed.

Step 4: Enter Token Details

Provide the required token details:

- Name
- Symbol
- Decimals (max: 9)
- Supply

After entering this information, click 'Save Data' and confirm by selecting 'Confirm Mint Token.'

The screenshot shows the Solana Mint Forge interface. At the top, it displays "Your IPFS CID:" followed by the CID: `QmVyasFFxegMW87kaqXD6ckD7WGcugjDXaxgv1IFHJepmv` and a "View file" link. Below this, a red circle highlights the input fields for token details: "Cat Coin" (Name), "CAT" (Symbol), "9" (Decimals), and "25000" (Supply). A "Save Data" button is visible at the bottom of the form. Below the screenshot, a large purple arrow points downwards, indicating the next step in the process.

Step 5: Sign Transactions

Sign four transactions in sequence without navigating away. Follow the on-screen prompts carefully to avoid any disruptions, as failure to complete each step correctly may result in a lost minting fee.

Minting Success!

Once all transactions are signed, a confirmation message will appear to signify successful token minting.

Congratulations! You now have your own token on the Solana Network.
