

This proposal indicates Dexlab's recommendation to PieDAO for the appointment of Cryptobuilders OU (<https://cryptobuilders.io/>), specifically Dan Matthews, to head their technology management efforts. Any compensation agreed between the parties for the above services would be subsequently submitted to PieDAO governance's vote for approval.

Dan is an experienced professional and active member of the global DeFi community, having already provided valuable contributions to the early set-up of PieDAO: The Dexlab leadership team is confident that his commitment to PieDAO's vision would represent a tremendous asset for PieDAO future development.
