## TEZOS NFT MARKETPLACE HIC ET NUNC (HEN) DISCONTINUED

At one point in the spring, it was one of the most popular NFT platforms in the world. This is a reminder that the NFT and crypto space is still new, disruptions will always happen, invest cautiously (or not).

This segment is sponsored by: [Eldee](#), [@ChefBoiEL\\_DEE](#)

## Be careful of FAKE Ronin Wallets

Be careful of all the fake ronin wallets! Make sure to get the official link on the official verified Twitter profile of [Axie Infinity](#). Once you have that official website, bookmark it so you never have to search for it again!

## Tip not to get scammed by collab.land bots in Discord

One tip to make sure you don't get scammed by fake collab.land bots in discord when verifying yourself in a discord server is to first click on the collab.land bot on the right hand side of the server. Take a picture of the bot's discord ID with your phone. Once you go through the verification process usually by typing something like "join!" the real bot usually DM's you, followed by 1-3 fake bots with similar names.

Compare the dm of the first bot's name and ID, chances are this is the real one but you can never be too sure.

You'll notice the other bots that followed are fake when comparing the discord name and ID to the picture you took of the real verified discord bot from the roles on the right hand side.

Share this tip with friends.

**This is not investment advice. Do your own research.

## **AXIE INFINITY: Bridge to Financial Independence**

Financial independence, is a state of being in which you don't have to work to pay your living expenses. You may decide to retire or you may choose to work because you want to, not because you have to.

Or we can call it financial freedom. Freedom from debt and freedom from poverty.

6 Ways for Axie Infinity to become a bridge to financial independence:

- 1.By playing.
- 2.By breeding and selling.
- 3.By being a manager.
- 4.By being a scholar.
- 5.By investing or trading.
- 6.By staking.

# PURE SPECULATIONS AND THEORIES

This segment is sponsored by: [AxieGlobal](#), [@axie\\_global](#)

## Is this bird meta too OP?

One of the most impressive builds in the game at the moment has to be the eggbomb/blackmail/haredagger bird. The versatility of using egg bomb can easily change the tide of a game, and with blackmail also gives them the ability to absolutely wreck one of your axes by taking the aroma off of themselves and placing it on their target. Hare dagger did not receive any nerfs and pulls a card when the axie attacks first, so not only does this bird PUMP damage and provide utility, it also pretty much guarantees you card draws. So strong with so many comps right now. Not to mention if you're going against a reptile or plant, the hare dagger is a beast type card and will do more than its stated 120 damage. Making this a very versatile card on a bird right now as we see more plant comps arising in the top of the arena.
