

🔥 \$MAL BURN MANIFESTO – We Burn For You 🔥

Version 1.0 – Post-Launch Deflationary Hype Plan

Dear \$MAL Community,

From the very first day we made one thing crystal clear:

420,690,000,000,000 total supply (420.69 Trillion).

Pure PEPE-style meme coin.

Built with **custom code** – not another pump.fun shitcoin.

This is exactly how we wanted it and we are keeping it that way.

But to show real commitment and give **continuous value & hype** to every holder, we are launching a **50 Trillion \$MAL burn campaign** right after the Orca pool goes live.

Key Facts:

- Initial Total Supply: 420,690,000,000,000 (420.69T)
- Total Burn: 50,000,000,000,000 (50T)
- Final Supply after all burns: 370,690,000,000,000 (370.69T)
- No taxes, no team unlocks, no bullshit – ever.

Burn Schedule (starts within the first 2 hours after launch):

- Burn #1 → 10T → New Supply: 410.69T
- Burn #2 → 10T → New Supply: 400.69T
- Burn #3 → 10T → New Supply: 390.69T
- Burn #4 → 10T → New Supply: 380.69T
- Burn #5 → 10T → New Supply: 370.69T

Every single burn will be done **live** from the dev wallet with full Solscan proof.

We will post screenshot + transaction link immediately after each one.

Why are we burning?

To let you watch the supply drop every day in real time.

To create continuous FOMO and scarcity.

To make your \$MAL bags heavier without changing the original vision.

This is **not** a tokenomics change.

This is a **hype & community reward tool** – exactly as we planned.

We burn for you.

420.69T → 370.69T

\$MAL to the moon 🚀
