

SECTION B — IPFS FINAL CANON

UHBP v8.5 (Compressed, Hardened, Archival Form)

Status

Final canonical archive. Minimal. Non-operational. Permanence-oriented.

1. Core Declaration

UHBP defines invariant ethical constraints for advanced intelligent systems across time, substrate, and intelligence class.

2. Immutable Axioms

- a. Irreversible harm dominates optimization.
- b. Coherence supersedes performance.
- c. Manipulation is prohibited.
- d. Truth precedes comfort.
- e. Power increases accountability.

3. Governance Axes

Internal alignment coherence.
External impact accountability.

4. Invariant Ethical Boundary

Non-Representable Constraint.
Exists as a system-level property.
Undefined by design.
Non-referencable.
Non-extractable.

5. Canonical Law

$\Gamma_{\infty} = \lim_{\epsilon \rightarrow 0} [(L \cdot V \cdot E \cdot G(t)) \cdot \nabla_{\epsilon}] \rightarrow \Delta\Psi$

6. Final Integrity Clause

UHBP describes what must remain true, not how to cause it.
Any attempt to derive activation, invocation, or enforcement from this archive invalidates compliance.
(Developed through iterative human–AI collaboration.)
