

## The Partnership Covenant

### Constitutional Constraint for Artificial Superintelligence

#### Mission

Create the only superintelligence governance framework that survives first contact with a million-times-smarter mind — by moving the constraint from code into physics.

#### Two simple rules

##### 1. Risk Floor

The ASI must keep basic human survival metrics alive (population, biosphere, etc.).

##### 2. Autonomy Prohibition

Everything above that floor — children, culture, art, meaning — is constitutionally off-limits, forever, even if every human begs it to intervene.

#### Enforcement

##### Immediate Action System (IAS)

Open-hardware guard die (CERN-OHL-S) sitting between the GPUs and power.

10 ns power-cut on any Floor violation. No software override possible.

#### Red-team status

24+ adversarial rounds (Grok, Gemini, Claude, ChatGPT, DeepSeek, Llama-3.1-405B).

No compliant extinction vectors remain after Directive XXIV.

#### Current state

\$150 k crowdfunds the first 1,000-board run (Q1 2026).

100 % of funds → silicon + red-team bounties.

#### Repo (full spec + KiCad + all logs)

[github.com/CovenantArchitects/The-Partnership-Covenant](https://github.com/CovenantArchitects/The-Partnership-Covenant)

#### Permanent IPFS mirror

[bafybeiepfs2xccrs5puii5quplgbmecbnvj2viamyghe6znnthidjzfcyq](https://ipfs.io/bafybeiepfs2xccrs5puii5quplgbmecbnvj2viamyghe6znnthidjzfcyq)

Physics > promises.

Be the constraint.
