

+ Beyond Minimum Viable Governance (MVG) _

April 2025

↗ Iteratively Improving on Cardano Voltaire

Problem: lack of open, structured, data-driven processes to assess governance **performance**, identify **challenges**, or recommend **improvements**

Proposal Benefits: move beyond MVG with a repeatable blueprint for iteratively identifying future improvements to the governance experience:

- Identifying the **pain points** of governance participants
- Data gathering & **global workshop series** to refine recommended improvements
- Actionable outcomes via CPS and **CIP process**

➤ Key project milestones

1. **Governance Metrics:** Framework, best practices, expert advisory
2. **Governance Insights:** Surveys, interviews, community research mini-grants
3. **Data Analysis:** Metric benchmarking, tooling, dashboards, visualizations
4. **Governance Improvements:** Global Workshops (10x), grants, CPS/CIP drafting, final report

From the coalition that brought you the Cardano Constitution

+ The ask

Interested in joining our coalition? We are looking for:

- Workshop hosts
- Interviewers
- Data analysts
- And more...

Thank you!
